

Wheat Domestic Fundamentals:

As per latest update, the Indian institute of wheat and barley research (IIWBR) has proposed a new variety known as DBW-187. This variety has already gained acceptance in north eastern states. Now IIWBR is planning to introduce the same in Haryana, Punjab and Western Uttar Pradesh. This variety is expected to replace HD-2967 and HD-3086 variety. The DBW-187 also known as karan vandana will have more than 12 percent protein content. Furthermore, yield of DBW-187 is expected to be around 7.5 tonnes per hectare compared to 6.5 tonnes per hectare for normal variety.

As per latest update, demand for wheat has increased in the feed industry due to higher prices of maize. However this trend is short lived as imported quantity of maize is likely to arrive during September and new crop in domestic market will start from October. Furthermore, government will increase reserve price of wheat by Rs 55 per quintal for the third quarter (Oct-Dec) to Rs 2190 per quintal.

Arhtiyas (commission agent) play a crucial role in procurement by providing around 66 percent of farm loans. The state is rolling out the public financial management system (PFMS) in two months. Arhtiyas were fearful that they might get affected. Punjab government has made it clear that under the APMC act, it is a state subject and the government is authorized to modify PFMS to retain role of Arhtiyas.

India mainly imports from Australia and Russia. Millers prefer Australian wheat over Russian/Ukrainian wheat due to better quality. As of now, Russian wheat with 12.5 percent protein content and Australian premium wheat (APW) is being quoted at \$349.30 (Rs 24024.85) per tonne and \$450.52 (Rs 30986.77) per tonne respectively, after including freight and import duty @40%. Local expenses will further add to cost. Whereas wheat mill quality price in Chennai is ruling around Rs 23000 per tonne. Therefore, as of now, there is no parity for wheat imports.

As per latest update, Punjab Chief Minister Amarinder Singh has asked the state to draw a comprehensive crop diversification model to save water that is being consumed in growing wheat and rice. CM also stressed on prioritizing less water consuming crops such as maize and cotton.

All India weekly average prices increased by 5.07 percent to Rs. 2121.87 per quintal during the week ended 31st July 2019. Wheat average price were ruling at Rs 2019.57 per quintal during 16-23 July 2019. As compared to prices in the week 24-31 July 2018, the prices are firm by 10.03 percent. Prices are expected to remain steady to firm in coming days due to hike in import duty and good demand in domestic market.

India has huge stockpiles of wheat. However India is not able to export wheat due to huge price difference. Neighbouring country like Bangladesh has approved a purchase of 1 LMT from Russia at \$267.30 per tonne including cost, insurance, freight and port related expenses. Whereas Wheat mill delivery price in Indore is hovering around \$309 per tonne.

As per latest update, roller flour mills in Punjab are facing a supply shortage even after bumper production as well as procurement in Punjab. According to Punjab Mandi Board, around 70-75 percent of wheat in the state is procured by procurement agencies. Due to luster loss this year, wheat sold by FCI is not fit for making Maida but can be used for making Aata. Therefore millers in Punjab are dependent on wheat supply from Uttar Pradesh. However that too has stopped due to better prices of wheat in Uttar Pradesh itself. Millers have met FCI official and asked for supply of wheat from August 15. FCI official have said, "We are working on it, this is not an issue which cannot be sorted out".

International Market Update:

As on 02nd August Russia has harvested 46.70 million tonnes of wheat compared to 39.5 million tonnes a year ago for the same date. Around 12.9 million hectares of area has been harvested with an average yield of 3.62 tonnes per hectare compared to 10.9 million hectares with an average yield of 3.64 tonnes per hectare a year ago for same date. Russian wheat with 11.5% protein content is being quoted at FoB \$ 188.00 per tonne.

Farm ministry has increased soft wheat production in France to 38.2 MMT up by 12 percent compared to last year. Forecast has been increased as analysts believe that heat wave in June and July had little impact on yields.

GASC (General Authority for Supply Commodities) has purchased 415000 tonnes of Russia, Ukraine and Romanian wheat through tender. Of the total quantity 60000 tonnes was of Romanian origin, 115000 tonnes was of Ukrainian origin and 240000 tonnes was of Russian origin. Egypt has bought 300000 MT of wheat in its last tender. Egypt is the largest importer of wheat and imports around 11-12 MMT of wheat every year.

Russia is expected to dominate the world wheat export market this year. Although sovecon has reduced production forecast however it is still higher compared to last year. Indonesia is one of the largest importer of wheat and a top buyer of Australian wheat. Due to third consecutive dry season availability of wheat for export in Australia has been impacted. Argentina has captured some demand but major share will be captured by Black Sea wheat. On an average, the spread between Australia standard wheat (ASW) and black sea wheat has increased from \$12 per tonne in 2017 to \$24 per tonne in 2019.

Outlook: Cash market is likely to trade steady to firm in the near term.
