

Wheat Domestic Fundamentals:

As per latest update, area sown until 15th November-19 is 32.98 lakh hectares compared to 42.40 lakh hectares in the previous Rabi season. The normal area is 305.58 lakh hectares. Acreage in Punjab is lagging behind by 46.80 percent due to curb on stubble burning by the government which led to delay in field preparation.

As per market sources, wheat stock in central pool as on 1st November'19 stood at 373.77 lakh tonnes down by 4.93% compared to last month. This quantity is higher by around 12.80% compared to last year for the same month. Government has already applied import duty on wheat to curb imports and provide support to domestic prices. Therefore, government has abundant supplies this year to tackle any unexpected rise in wheat prices by selling more quantity in open market.

All India weekly average prices increased by 0.47 percent to Rs. 2153.72 per quintal during the week ended 08th November 2019. Wheat average price were ruling at Rs 2143.68 per quintal during 24-31 October 2019. As compared to prices in the week 01-08 November 2018, the prices are firm by 5.60 percent. Prices are expected to remain steady to firm in coming days due to no import parity and likely increase in demand in domestic market.

Floods and unseasonal rains have affected the sowing of crops in many states of the country. Sowing of wheat, the main Rabi crop, is lagging behind in the initial stages. Sowing of wheat is lagging behind in Madhya Pradesh, due to heavy rains in the state in September, flood-like conditions were created in many districts, whereas in October too, there has been more than normal rainfall. As per the Ministry of Agriculture, total sowing of rabi crops has been done in 95.35 lakh hectare as compared to 112.24 lakh hectare till this time last year. According to the ministry, wheat has been sown in only 9.69 lakh hectare, the main Rabi crop so far, while by last year it had been sown in 15.35 lakh hectare. Sowing of Rabi crops is still at an early stage and is likely to pick up with time.

Madhya Pradesh government is encouraging farmers to cultivate cashew rather than regular crop like wheat. The state has witnessed heavy rains as well as dry conditions which has impacted crops. Government is promoting cash crops among farmers by waiving loans, providing electricity at half price, subsidizing farm equipment's, etc. All this has made a positive effect and some farmers have shifted to cashew farming.

The agriculture department of Punjab has advised farmers to sow only varieties that are recommended by Punjab agriculture university (PAU). HD 2967, HD 3086, PBW 343, PBW 550, PBW 725, PBW 677, WH 1105, PBW 621 and WHD 943 are among the PAU recommended varieties. Late sown varieties include PBW 658 and PBW 590. The above mentioned varieties are likely to give better yields. Therefore, under normal conditions a good harvest can be expected in Punjab.

Wheat stock in central pool is 393.16 lakh tonnes higher by 36.91 lakh tonnes compared to last year for the same month. Stock disposal still remains a problem as Indian wheat is not competitive in international market due to higher prices and domestic demand is limited. Furthermore, India is expected to see another good year of production due to good soil moisture and higher acreage.

India has raised MSP by Rs 85 per quintal to Rs 1925 per quintal for MY 2020-21. The hike in MSP is lowest in last three years. Even though this increase is lower it has still widened the gap between domestic and international prices. India wheat FoB at Kandla is ruling around \$312 per tonne compared to \$203.5 per tonne for Russian wheat with 11.5 percent protein content.

As per trade source, India has exported around 10.64 thousand tonnes in the month of September-2019. The quantity in September-2019 was exported at an average FOB of \$ 373.12 per tonne and the major destinations were Nepal, Jordan, UAE and Somalia. Exports are likely to be at lower side as other countries are able to provide quality wheat at competitive prices.

International Market Update:

Japan's Ministry of Agriculture sought 119,998 tonnes of food-quality wheat from the United States and Canada in a regular tender on Tuesday. Japan is the world's sixth-largest wheat importer and keeps a tight grip on imports of the country's second-most important staple after rice and buys the majority of the grain for milling via tenders typically issued three times a month.

South Korea's largest animal feed maker has bought, NOFI, has bought around 60000 tonnes of feed wheat at \$228.70 C&F. The quantity is expected to arrive around 10th March-2020. The seller is expected to be trading house Agroc corp.

Argentina wheat harvest for 2019-20 is expected to be 18.8 MMT compared to 19.8 MMT in previous forecast. Unfavorable weather conditions such as alternating temperatures with frequent frost has negatively impacted the crop. Argentina wheat is expected to be more competitive in global market. However, if current conditions continue the scenario may change.

Black sea milling wheat prices became firm by \$1 per tonne at Novorossiysk and \$0-1 per tonne at Odessa port compared to last week. Lower wheat production forecast from Argentina has increased demand for Black sea wheat. However black sea wheat prices are already trading at a premium. As of now Russian milling wheat with 12.5% protein content at Novorossiysk and Odessa port are being quoted at FoB \$208-211/tonne and FoB \$205-210/tonne.
