

Wheat Domestic Fundamentals:

As per latest update, area sown until 22nd November-19 is 96.77 lakh hectares compared to 99.64 lakh hectare in the previous Rabi season. The normal area is 305.58 lakh hectares. In Gujarat, irrigated wheat sowing is reported on about 40,000 hectares, which is barely 4 per cent of the normal sowing.

As per market sources, wheat stock in central pool as on 1st November'19 stood at 373.77 lakh tonnes down by 4.93% compared to last month. This quantity is higher by around 12.80% compared to last year for the same month. Government has already applied import duty on wheat to curb imports and provide support to domestic prices. Therefore, government has abundant supplies this year to tackle any unexpected rise in wheat prices by selling more quantity in open market.

All India weekly average prices increased by 0.47 percent to Rs. 2153.72 per quintal during the week ended 08th November 2019. Wheat average price were ruling at Rs 2143.68 per quintal during 24-31 October 2019. As compared to prices in the week 01-08 November 2018, the prices are firm by 5.60 percent. Prices are expected to remain steady to firm in coming days due to no import parity and likely increase in demand in domestic market.

Farmers in Amritsar, Punjab have to sow the seeds of the wheat crop again as the earlier sown seeds were damaged by heavy hailstorm and rain during the first week of November. The seeds did not germinate due to more moisture content in the soil. They have to face double loss of sowing the wheat again and less per acre yield amid late sowing. According to market sources, a loss of 1.5 quintal is usually witnessed if the crop sowing is delayed by one week. Now, as the sowing has been delayed by two-three weeks, it is expected that estimated per acre loss would be around four quintals.

Wheat WPI has increased from 158.3 in September -2019 to 160.6 in October-2019. Monthly wheat inflation has increased by 1.45 percent in October-2019 compared to previous month.

Madhya Pradesh government is encouraging farmers to cultivate cashew rather than regular crop like wheat. The state has witnessed heavy rains as well as dry conditions which has impacted crops. Government is promoting cash crops among farmers by waiving loans, providing electricity at half price, subsidizing farm equipment's, etc. All this has made a positive effect and some farmers have shifted to cashew farming.

The agriculture department of Punjab has advised farmers to sow only varieties that are recommended by Punjab agriculture university (PAU). HD 2967, HD 3086, PBW 343, PBW 550, PBW 725, PBW 677, WH 1105, PBW 621 and WHD 943 are among the PAU recommended varieties. Late sown varieties include PBW 658 and PBW 590. The above mentioned varieties are likely to give better yields. Therefore, under normal conditions a good harvest can be expected in Punjab.

India has raised MSP by Rs 85 per quintal to Rs 1925 per quintal for MY 2020-21. The hike in MSP is lowest in last three years. Even though this increase is lower it has still widened the gap between domestic and international prices. India wheat FoB at Kandla is ruling around \$312 per tonne compared to \$203.5 per tonne for Russian wheat with 11.5 percent protein content.

As per trade source, India has exported around 10.64 thousand tonnes in the month of September-2019. The quantity in September-2019 was exported at an average FOB of \$ 373.12 per tonne and the major destinations were Nepal, Jordan, UAE and Somalia. Exports are likely to be at lower side as other countries are able to provide quality wheat at competitive prices.

International Market Update:

According to official sources, Egypt's state grain buyer bought 465,000 tonnes of wheat in an international purchase tender last week. The purchase comprised of 345,000 tonnes of Russian wheat and 120,000 tonnes of Ukrainian wheat.

According to government sources, Zimbabwe has removed import controls on wheat flour following a severe drought that has reduced supplies in the country. Millers will no longer be able to buy grain at subsidized prices from the state grain agency.

In U.K., area under winter wheat is forecast to decline by 10 percent compared to previous year. Continued wet weather has prolonged this autumn's drilling season and growers intend to plant 1.65 million hectares compared to 1.82 million hectares previous year.

According to official sources, Egypt's state grain buyer bought 465,000 tonnes of wheat in an international purchase tender last week. The purchase comprised of 345,000 tonnes of Russian wheat and 120,000 tonnes of Ukrainian wheat.

According to the government, Algeria has decided to cap soft wheat imports at 4 million tonnes a year, down from 6.2 million tonnes. The move is designed to preserve foreign currency and reduce Algerian imports of cereals, especially soft wheat.

According to trade sources, Argentina is set to dominate Asia's grain market for a second consecutive year in 2020 as trading companies are already buying significant volumes anticipating good first-quarter demand in the region. Drought in Australia is likely to reduce exports from the country.
