

Wheat Domestic Fundamentals:

As per latest update, area sown until 29th November-19 is 150.74 lakh hectares compared to 141.25 lakh hectare in the previous Rabi season. The normal area is 305.58 lakh hectares. Acreage under wheat has increased in the states of Madhya Pradesh and Rajasthan till date.

As per market sources, wheat stock in central pool as on 1st November'19 stood at 373.77 lakh tonnes down by 4.93% compared to last month. This quantity is higher by around 12.80% compared to last year for the same month. Government has already applied import duty on wheat to curb imports and provide support to domestic prices. Therefore, government has abundant supplies this year to tackle any unexpected rise in wheat prices by selling more quantity in open market.

All India weekly average prices increased by 0.47 percent to Rs. 2153.72 per quintal during the week ended 08th November 2019. Wheat average price were ruling at Rs 2143.68 per quintal during 24-31 October 2019. As compared to prices in the week 01-08 November 2018, the prices are firm by 5.60 percent. Prices are expected to remain steady to firm in coming days due to no import parity and likely increase in demand in domestic market.

Farmers in Amritsar, Punjab have to sow the seeds of the wheat crop again as the earlier sown seeds were damaged by heavy hailstorm and rain during the first week of November. The seeds did not germinate due to more moisture content in the soil. They have to face double loss of sowing the wheat again and less per acre yield amid late sowing. According to market sources, a loss of 1.5 quintal is usually witnessed if the crop sowing is delayed by one week. Now, as the sowing has been delayed by two-three weeks, it is expected that estimated per acre loss would be around four quintals.

Wheat WPI has increased from 158.3 in September -2019 to 160.6 in October-2019. Monthly wheat inflation has increased by 1.45 percent in October-2019 compared to previous month.

India received monsoon rains during the June-September season that were 10% above average and the rainfall continued during October and November, increasing soil moisture levels required for crop sowing. Farmers are likely to increase the acreage under wheat as it a more stable crop following purchase by the government. However sowing has been delayed following wet weather and yield could be affected. Much depends on the weather conditions in the coming days.

The agriculture department of Punjab has advised farmers to sow only varieties that are recommended by Punjab agriculture university (PAU). HD 2967, HD 3086, PBW 343, PBW 550, PBW 725, PBW 677, WH 1105, PBW 621 and WHD 943 are among the PAU recommended varieties. Late sown varieties include PBW 658 and PBW 590. The above mentioned varieties are likely to give better yields. Therefore, under normal conditions a good harvest can be expected in Punjab.

India has raised MSP by Rs 85 per quintal to Rs 1925 per quintal for MY 2020-21. The hike in MSP is lowest in last three years. Even though this increase is lower it has still widened the gap between domestic and international prices. India wheat FoB at Kandla is ruling around \$312 per tonne compared to \$203.5 per tonne for Russian wheat with 11.5 percent protein content.

As per trade source, India has exported around 10.64 thousand tonnes in the month of September-2019. The quantity in September-2019 was exported at an average FOB of \$ 373.12 per tonne and the major destinations were Nepal, Jordan, UAE and Somalia. Exports are likely to be at lower side as other countries are able to provide quality wheat at competitive prices.

International Market Update:

Japan's Ministry of Agriculture has sought 160,640 tonnes of food-quality wheat from the United States and Canada in a regular tender on December 03, 2019. Japan, the world's sixth-largest wheat importer, keeps a tight grip on imports of the country's second-most important staple after rice and buys the majority of the grain for milling via tenders typically issued three times a month. The tender will close late Thursday on 05 December, 2019.

Iraq has outlined its wheat import goal for 2020. It has planned to purchase 750,000 tonnes of wheat from abroad in 2020 and nationwide protests that have extended to a key port were not disrupting shipments so far according to sources at the Iraq Grain Board. Iraq needs between 4.5 million and 5 million tonnes of wheat a year to supply its food rationing program. It mixes local wheat with grain from Australia, Canada and the United States.

Australia's agricultural department has reduced its forecast for wheat production in 2019-20 (April –March) following unfavourable weather in the growing regions. The wheat production is expected to fall 16.8% to 15.85 MMT according to the Bureau of Agricultural and Resource Economics and Sciences. The forecast is 8.4% lower from the amount of wheat produced in 2018-19. Western Australia, one of the major wheat producing regions in Australia was hit by below-average winter rainfall and above-average temperatures, leading to a decline in wheat production by 41% to around 6 MMT.

According to official sources, Egypt's state grain buyer bought 465,000 tonnes of wheat in an international purchase tender last week. The purchase comprised of 345,000 tonnes of Russian wheat and 120,000 tonnes of Ukrainian wheat.

According to government sources, Zimbabwe has removed import controls on wheat flour following a severe drought that has reduced supplies in the country. Millers will no longer be able to buy grain at subsidized prices from the state grain agency.
