

Wheat Domestic Fundamentals:

As per latest update, area sown until 13th December-19 is 248.03 lakh hectares compared to 226.25 lakh hectare in the previous Rabi season. The normal area is 305.58 lakh hectares. Acreage under wheat has increased in the states of Madhya Pradesh, Gujarat, Maharashtra and Rajasthan till date.

As per market sources, wheat stock in central pool as on 1st November'19 stood at 373.77 lakh tonnes down by 4.93% compared to last month. This quantity is higher by around 12.80% compared to last year for the same month. Government has already applied import duty on wheat to curb imports and provide support to domestic prices. Therefore, government has abundant supplies this year to tackle any unexpected rise in wheat prices by selling more quantity in open market.

All India weekly average prices declined by 0.69 percent to Rs. 2218.98 per quintal during the week ended 7th December 2019. Wheat average price were ruling at Rs 2234.40 per quintal during 23-30 November 2019. As compared to prices in the week 01-07 December 2018, the prices are firm by 6.62 percent. Prices are expected to remain steady to weak in coming days amid increase in wheat acreage till date.

Rain and hailstorm have been reported in the wheat growing regions of Haryana. Planting had been delayed due to rains in the previous month. However any major damage is not expected as the crop is in tillering and sprouting stages. Tillering starts after 20 days of germination and sprouting starts after 30 -35 days of sowing the crop.

In Sangrur district, the attack of armyworms and pink stem borer has affected the wheat crop spread over 2,500 acres here. Farmers claim that the sowing of wheat without burning of paddy stubble has caused the disease. Agricultural experts are organising special meetings to spread awareness about preventive measures and some farmers have started ploughing their crops.

Wheat WPI has increased from 158.3 in September -2019 to 160.6 in October-2019. Monthly wheat inflation has increased by 1.45 percent in October-2019 compared to previous month.

India received monsoon rains during the June-September season that were 10% above average and the rainfall continued during October and November, increasing soil moisture levels required for crop sowing. Farmers are likely to increase the acreage under wheat as it a more stable crop following purchase by the government. However sowing has been delayed following wet weather and yield could be affected. Much depends on the weather conditions in the coming days.

India has raised MSP by Rs 85 per quintal to Rs 1925 per quintal for MY 2020-21. The hike in MSP is lowest in last three years. Even though this increase is lower it has still widened the gap between domestic and international prices. India wheat FoB at Kandla is ruling around \$312 per tonne compared to \$203.5 per tonne for Russian wheat with 11.5 percent protein content.

As per trade source, India has exported around 11.96 thousand tonnes in the month of October-2019. The quantity in October-2019 was exported at an average FOB of \$ 304.90 per tonne and the major destinations were Nepal, Jordan, UAE and Somalia. Exports are likely to be at lower side as other countries are able to provide quality wheat at competitive prices.

International Market Update:

Argentina's new government has increased tax on wheat exports from 6.7% to 12%. In anticipation of the increase in export taxes, farmers and traders were selling grains at a rapid pace before the new government took charge on December 10. Argentina shipped 230,000 metric tonnes of wheat in October and 700,000 metric tonnes in November according to trade sources.

The Sindh food department has signed a memorandum of understanding for the procurement of 300,000 tonnes of wheat with the Pakistan Agricultural Storage and Services Corporation (PASSCO). This wheat was being supplied to flour mills at subsidised rates, with the federal and provincial governments covering 50 percent of the cost.

Tunisia's state grains agency has issued an international tender to purchase around 100,000 tonnes of durum wheat and 92,000 tonnes of soft wheat. The tender closed on Dec. 13, 2019. The grains can be sourced from optional origins for 2020 shipment. The durum was sought in four consignments of 25,000 tonnes and the soft wheat in three of 25,000 tonnes and one of 17,000 tonnes. The durum shipment was sought between Jan. 15 and March 25, depending on origin selected. The soft wheat shipment was sought between Jan. 10 and Feb. 25, 2020.

According to the latest COCERAL Grain Report, European Union's wheat production estimates have been increased by 14.3% to 152.6 MMT in 2019-20 compared to previous year. The EU is the world's largest wheat producer and second-largest exporter after Russia.
