

**Wheat Domestic Fundamentals:**

**As per latest update, area sown until 10<sup>th</sup> January-20 is 326.46 lakh hectares compared to 293.81 lakh hectare in the previous Rabi season. The normal area is 305.58 lakh hectares. Acreage under wheat has increased in the states of Madhya Pradesh, Gujarat, Haryana, Maharashtra, Rajasthan and Uttar Pradesh till date.**

**There have been good rains in Karnal during the last few days, which is conducive for the wheat crop. However experts have advised farmers to take precaution regarding yellow crust. Farmers are advised to drain off excessive water, which might affect production if allowed to stagnate in the fields.**

**As per market sources, wheat stock in central pool as on 1st December'19 stood at 351.75 lakh tonnes down by 5.89% compared to last month. This quantity is higher by around 14.84% compared to last year for the same month. Government has already applied import duty on wheat to curb imports and provide support to domestic prices. Therefore, government has abundant supplies this year to tackle any unexpected rise in wheat prices by selling more quantity in open market.**

**All India weekly average prices increased by 0.76 percent to Rs. 2236.04 per quintal during the week ended 28th December 2019. Wheat average price were ruling at Rs 2219.24 per quintal during 16-23 December 2019. As compared to prices in the week 24-31 December 2018, the prices are higher by 8.30 percent. Prices are expected to remain steady to firm in coming days amid good demand in the domestic market.**

**The Food Crop of India (FCI) has proposed reducing the offer price of wheat under the open market sale scheme to 2,145 rupees per 100 kg from 2,245 rupees to make the central pool stock more attractive for bulk users according to a senior government official. It has also suggested offering lustre-lost wheat procured last year at 2,080 rupees per 100 kg. The decision is yet to be approved by the ministry.**

**According to FCI, wheat stocks in the central pool as on 1st December 2019, is reported at 351 lakh metric tonnes, which is at seven-year high. Stocks have increased amid 'open-ended' procurement in recent years, as a result of which the Centre has been procuring a third of the wheat output, against about 25 per cent some years back. This year farmers in Madhya Pradesh, Gujarat and Maharashtra are shifting from chana towards wheat following higher soil moisture and water availability leading to higher acreage till date. Storage will become an issue for the government following higher stocks currently and another year of expected bumper production. Weather in the coming days will determine the actual output of wheat.**

**Wheat WPI has increased from 160.6 in October -2019 to 164.4 in November-2019. Monthly wheat inflation has increased by 2.37 percent in November-2019 compared to previous month.**

**India has raised MSP by Rs 85 per quintal to Rs 1925 per quintal for MY 2020-21. The hike in MSP is lowest in last three years. Even though this increase is lower it has still widened the gap between domestic and international prices. India wheat FoB at Kandla is ruling around \$312 per tonne compared to \$203.5 per tonne for Russian wheat with 11.5 percent protein content.**

**As per trade source, India has exported around 21.40 thousand tonnes in the month of November-2019. The quantity in November-2019 was exported at an average FOB of \$ 298.15 per tonne and the major destinations were Bangladesh, Nepal, Jordan, UAE and Sri Lanka. Exports are likely to be at lower side as other countries are able to provide quality wheat at competitive prices.**

**International Market Update:**

**Jordan's state grain buyer, the trade ministry has issued an international tender to buy 120,000 tonnes of milling wheat which can be sourced from optional origins according to European traders. The new tender seeks hard wheat for shipment in a range of possible combinations in 60,000 tonne consignments. Shipment is sought between June 1-June 15, June 16-June 30, July 1-July 15 and July 16-July 31.**

**The USDA report revises its market year 2017-18 wheat import estimate for Vietnam up to 4.8 MMT while in wheat milling imports in market year 2018-19 remained flat due to a saturated local flour market. Feed wheat imports fell 55% as the country's pig population is declining amid African Swine Fever. The 2019-20 estimates for wheat and flour imports remains same as the 2018-19 estimate of 3.5 MMT.**

**According to Egypt's General Authority for Supply commodities, the government has purchased 300,000 tons of wheat from Russia, Ukraine and Romania through global tenders. Egypt is due to receive the new shipments of wheat between February 18 and 28, according to official sources.**

**Japan's Ministry of Agriculture, Forestry and Fisheries (MAFF) seeks 120,000 tonnes of feed wheat to be loaded by February 15 and arrive in Japan by March 19, via a simultaneous buy and sell (SBS) auction that will be held on Jan. 15.**

**Japan's Ministry of Agriculture sought 106,125 metric tonnes of food-quality wheat from U.S., Canada and Australia. The tender will close on Thursday.**
