

Wheat Domestic Fundamentals:

As per Uttarakhand government, hiked in the Minimum Support Price (MSP) of Wheat by Rs. 65 to Rs. 1,925 per quintal from 1,860 per quintal.

As per the latest update wheat cash market is likely to stay steady to slightly weak as stock in central pool is higher and new crop is at hand. Likely bumper production this year and FCI urgency to release old stock may pressurize wheat cash market in coming weeks. If off take remains slow at this point of time. FCI may consider to decrease bench mark price.

As per Govt. sources the second crop forecast of India is projected to produce a record 106.2 million tonnes of wheat crop in 2019-20 because of favourable weather conditions and improve crop yields. Wheat output is expected to go up by 2.5% in the crop year. Which expected to reach 291.9 million tonnes in 2019-20 from 285.2 million tonnes last year.

As per latest update, Due to weak demand from bulk buyers and largely steady arrivals, Prices of wheat falls today as most bulk buyers moved to the government weekly auctions. In Indore and Jaipur arrivals were pegged steady at 1,000 and 800-900 bags.

As per latest update, area sown until 31st January-20 is 336.18 lakh hectares compared to 299.30 lakh hectare in the previous Rabi season. The normal area is 305.58 lakh hectares. Acreage under wheat has increased in the states of Madhya Pradesh, Gujarat, Maharashtra and Rajasthan till date.

As per market experts bumper production seems on the card despite unseasonal rains and locusts attack in Rajasthan. This year there will be record food grain production led by wheat along with corn and jowar. Wheat production during Rabi 2019-20 is estimated at 109 MMT which is 6.27% higher than last year production of 102.1 MMT. Production of wheat is expected to increase following higher acreage amid increase in MSP. Farmers prefer wheat over other Rabi crops in irrigated areas because of assured return as FCI undertakes procurement at MSP. Secondly, prolonged cold waves and winter rainfall in certain states have contributed to increase in yield of wheat.

As per market sources, wheat stock in central pool as on 1st February'20 stood at 303.66 lakh tonnes down by 7.41% compared to last month. This quantity is higher by around 26.89% compared to last year for the same month. Government has already applied import duty on wheat to curb imports and provide support to domestic prices. Therefore, government has abundant supplies this year to tackle any unexpected rise in wheat prices by selling more quantity in open market.

The reserve price of wheat under OMSS has been reduced to Rs 2,135/quintal for fair average quality (FAQ) and to Rs 2,080/quintal for lower quality. The benchmark price was Rs 2,245/quintal for the January-March period of 2019-20. When the OMSS scheme was announced in April last year, the government had fixed reserve price of wheat for each quarter during FY20. The objective was to liquidate more wheat with minimum losses. Reduction has been made to make space for the procurement of the new crop. According to trade sources, about 1.7 MT of wheat has been sold under OMSS, however official data showed it was less than a million tonne until November 28, 2019.

All India weekly average prices increased by 15.63 percent to Rs. 2673.31 per quintal during the week ended 1st February 2020. Wheat average price were ruling at Rs 2312.03 per quintal during 24-31 January 2020. As compared to prices in the week 01-08 February 2020, the prices are higher by 26.56 percent. Prices are expected to trade steady to weak in coming days amid expected bumper crop this season. Though unseasonal rains, yellow rust and locust attacks have been reported in some areas, production is however expected to be higher this season.

International Market Update:

According to U.S. Department of Agriculture (USDA) statement, U.S wheat may now be shipped to Kenya as Kenya has agreed to lift a decade old prohibition on US wheat. This step will allow U.S. wheat from Idaho, Oregon and Washington states to Kenya regardless of state of origin or port of export.

According to Chicago Board Of Trade, Chicago wheat futures slid for a fourth consecutive session on Monday. The wheat contract on the Chicago Board Of Trade was down 1.5% to \$5.44 a bushel by 0402 GMT, near the session low of \$5.43 a bushel - the weakest since Feb.

According to ABARES the wheat production was 15.2 million tonnes in 2019, down from the 15.85mt they predicted in December and behind last year's crop of 17.3mt.g. Government commodity forecaster ABARES said the 2019 wheat production was 15.2 million tonnes, down from the 15.85mt they predicted in December and behind last year's crop of 17.3mt.

According to the final estimates released by the Ministry of National Food Security and Research (MNFS&R), Pakistan, wheat during the current season was sown over an area of 8.839 million hectares against the set target of 9.062 million hectares which might affect wheat production target of 27.03 MMT fixed by the government. In Sindh, the second largest producer after Punjab, wheat was sown over an area of 1.115 million hectares against the target of 1.150 million hectares. Acreage has reduced in the major growing regions amid late start of sugarcane crushing, climatic change, heavy rains and snowfall during the sowing season
