

Wheat Domestic Fundamentals:

As per Uttarakhand government, Minimum Support Price (MSP) of Wheat has been hiked by Rs. 65 to Rs. 1,925 per quintal from 1,860 per quintal.

As per the latest update wheat cash market is likely to stay steady to slightly weak as stock in central pool is higher and new crop is at hand. Likely bumper production this year and FCI urgency to release old stock may pressurize wheat cash market in coming weeks. If off take remains slow at this point of time. FCI may consider to decrease bench mark price.

Cases of the yellow rust attack on wheat crop have been reported in Kangra and Una districts of Himachal Pradesh. There is lack of availability of pesticides according to the farmers thereby leading to yellow rust cases in almost all parts of the district.

As per Govt. sources the second crop forecast of India is projected to produce a record 106.2 million tonnes of wheat crop in 2019-20 because of favourable weather conditions and improve crop yields. Wheat output is expected to go up by 2.5% in the crop year. Which expected to reach 291.9 million tonnes in 2019-20 from 285.2 million tonnes last year.

As per latest update, area sown until 31st January-20 is 336.18 lakh hectares compared to 299.30 lakh hectare in the previous Rabi season. The normal area is 305.58 lakh hectares. Acreage under wheat has increased in the states of Madhya Pradesh, Gujarat, Maharashtra and Rajasthan till date.

As per market experts bumper production seems on the card despite unseasonal rains and locusts attack in Rajasthan. This year there will be record food grain production led by wheat along with corn and jowar. Wheat production during Rabi 2019-20 is estimated at 109 MMT which is 6.27% higher than last year production of 102.1 MMT. Production of wheat is expected to increase following higher acreage amid increase in MSP. Farmers prefer wheat over other Rabi crops in irrigated areas because of assured return as FCI undertakes procurement at MSP. Secondly, prolonged cold waves and winter rainfall in certain states have contributed to increase in yield of wheat.

As per market sources, wheat stock in central pool as on 1st February'20 stood at 303.66 lakh tonnes down by 7.41% compared to last month. This quantity is higher by around 26.89% compared to last year for the same month. Government has already applied import duty on wheat to curb imports and provide support to domestic prices. Therefore, government has abundant supplies this year to tackle any unexpected rise in wheat prices by selling more quantity in open market.

All India weekly average prices declined by 4.19 percent to Rs. 2137.82 per quintal during the week ended 28th February 2020. Wheat average price were ruling at Rs 2231.28 per quintal during 16-23 February 2020. As compared to prices in the week 24-28 February 2019, the prices are higher by 5.58 percent. Prices are expected to trade steady to weak in coming days amid lack of demand in the spot market. Though unseasonal rains, yellow rust and locust attacks have been reported in some areas, bumper production is expected this season.

International Market Update:

According to the Ukrainian grain traders union (UGA), Ukraine's 2020 wheat harvest is likely to increase to 28.8 MMT from 28.2 MMT previous year.

Pakistan is likely to harvest around 25.5 to 26.5 MMT of wheat against the production target of 27.03 MMT for Rabi 2019-2020, according to estimates by stakeholders. The main limiting factor hindering development of wheat plant was stated to be widespread attack of rust fungus diseases, which according to an estimate might dent output by at least one MMT.

Tunisia's state grains agency has purchased 125,000 metric tonnes of milling wheat in five 25,000 tonne consignments. The tender closed on Tuesday. The wheat is expected to be shipped between March 15 –May 25, 2020.

According to the latest estimates released by the International Grains Council (IGC), world wheat production is expected to rise to a record 769 MMT in the 2020/21 season boosted by a 2% rise in area. The upward revision for 2019/20 global wheat production was partly due to an improved outlook for India where the crop is now seen rising to 103.6 MMT, up from a previous forecast of 102.2 MMT and previous season's output of 99.7 MMT.

According to U.S. Department of Agriculture (USDA) statement, U.S wheat may now be shipped to Kenya as Kenya has agreed to lift a decade old prohibition on US wheat. This step will allow U.S. wheat from Idaho, Oregon and Washington states to Kenya regardless of state of origin or port of export.

According to ABARES the wheat production was 15.2 million tonnes in 2019, down from the 15.85mt they predicted in December and behind last year's crop of 17.3mt.g. Government commodity forecaster ABARES said the 2019 wheat production was 15.2 million tonnes, down from the 15.85mt they predicted in December and behind last year's crop of 17.3mt.
