

### Wheat Domestic Fundamentals:

**As per the latest update wheat cash market is likely to trade mixed in the near -term.** In Punjab, around 3% crop loss is expected in the wheat growing regions following recent rains and hailstorm. However exact crop loss will be clear in the coming days. In Gujarat, bumper wheat production is expected this season. However prices have declined amid supply disruptions to different parts of the country following Covid-19 scare and reduced demand. In Rajasthan prices firmed up as stockists have almost exhausted their stock and new crop arrival will be delayed by 2-3 weeks following recent rainfall.

**As per market sources, wheat stock in central pool as on 1st March'20 stood at 275.21 lakh tonnes down by 9.37% compared to last month.** This quantity is higher by around 36.86% compared to last year for the same month. Government has already applied import duty on wheat to curb imports and provide support to domestic prices. Therefore, government has abundant supplies this year to tackle any unexpected rise in wheat prices by selling more quantity in open market.

**The Uttar Pradesh government has set a wheat procurement target of 5.5 MMT** for the coming 2020-21 rabi marketing season at the minimum support price of Rs.1925/Qtl. Of the total target of 5.5 MMT, the Food Corporation of India (FCI) will directly procure 150,000 tonnes, while the remaining wheat would be purchased by the various state government agencies, which would set up 5,000 procurement centres across UP. The bulk of 2.5 MMT and 0.5 MMT would be procured by the UP Cooperative Federation Limited (UPCFL) and UP Cooperative Union (UPCU) respectively. The procurement would start from April 1 and continue for the successive two and half months till June 15, 2020. The procurement would not stop during this period even if the seasonal target is achieved during the meantime.

**As per Uttarakhand government, Minimum Support Price (MSP) of Wheat** has been hiked by Rs. 65 to Rs. 1,925 per quintal from 1,860 per quintal.

**As per Govt. sources the second crop forecast of India is projected to produce a record 106.2 MMT** of wheat crop in 2019-20 because of favourable weather conditions and improve crop yields. Wheat output is expected to go up by 2.5% in the crop year, which is expected to reach 291.9 MMT in 2019-20 from 285.2 MMT last year.

**As per latest update, area sown until 31<sup>st</sup> January-20 is 336.18 lakh hectares compared to 299.30 lakh hectare** in the previous Rabi season. The normal area is 305.58 lakh hectares. Acreage under wheat has increased in the states of Madhya Pradesh, Gujarat, Maharashtra and Rajasthan till date.

**As per market sources, wheat stock in central pool as on 1st February'20 stood at 303.66 lakh tonnes down by 7.41% compared to last month.** This quantity is higher by around 26.89% compared to last year for the same month. Government has already applied import duty on wheat to curb imports and provide support to domestic prices. Therefore, government has abundant supplies this year to tackle any unexpected rise in wheat prices by selling more quantity in open market.

**All India weekly average prices declined by 4.62 percent to Rs. 2029.78 per quintal during the week** ended 15th March 2020. Wheat average price were ruling at Rs 2128.15 per quintal during 01-08 March 2020. As compared to prices in the week 09-15 March 2019, the prices are lower by 1.88 percent. Prices are expected to trade steady to weak in coming days amid new crop arrival in the market. Though unseasonal rains, yellow rust and locust attacks have been reported in some areas, bumper production is expected this season.

### International Market Update:

**Tunisia's state grains agency has issued an international tender to purchase around 67,000 tonnes** of durum wheat and 25,000 tonnes of soft wheat according to European traders. The tender closes on Tuesday, March 17. The grains can be sourced from optional origins and shipment is expected in April.

**The European association Cocal revised its 2020/21 wheat production estimates** from initial forecasts last month in a recent report. Cocal estimate the UK wheat area at 1478KHa with a yield of 7.38t/ha. For the EU and UK, soft wheat production was lowered 1.4MMT to 136.5MMT due to persistent torrential rain disrupting sowing and affecting crop conditions. This is significantly down on last year which was recorded at 145.7MMT. With a reduced wheat production figure, crop conditions will be an important focus for milling quality amidst the frequent rainfall and a greater volume of grain imports into the EU and UK may be seen.

**Jordan's state grain buyer the trade ministry has issued an international tender to buy 120,000 tonnes of milling wheat** which can be sourced from optional origins according to European traders. The tender will close on March 17, 2020. The new tender seeks hard wheat for shipment in a range of possible combinations in 60,000 tonne consignments. Possible shipment periods are Sept. 16-30, Oct. 1-15, Oct. 16-31 and Nov. 1-15.

**Iran's wheat output is forecast to be around 15.36 MMT by the year 2028 from 13.57 MMT in 2019**, registering an annual growth of 2.7% year-on-year. The forecast was made in a joint report released by the Food and Agricultural Organization of the United Nations and the Organization for Economic Cooperation and Development.
