

Wheat Domestic Fundamentals:

Punjab government is gearing up for wheat procurement in the state from April 15. It is making arrangements for the harvest of bumper wheat crop of 182 lakh tonnes. About 27 lakh coupons will be issued to wheat growers for bringing their crop to grain markets for procurement, starting from April 15, as part of the measures to prevent overcrowding in the wake of corona virus outbreak. The state government has already decided to stagger wheat procurement by extending the procurement season till June 15. The government expects over 137 lakh tonnes of wheat would arrive in grain markets. It is estimating to procure 135 lakh metric tonnes of crop for the Rabi marketing season 2020-21 according to official sources. To keep a check on overcrowding in mandis, the number of purchase centres has also been expanded to around 3,691 in the state. Haryana Government will start procurement from April 20.

Harvesting of wheat is gathering momentum in Bihar and it is expected to be completed in the next 10 days. The major wheat producing districts of Bihar are Patna, Nalanda, Bhojpur, Buxar, Rohtas, Muzaffarpur and Sitamarhi

There could be shortage of wheat flour in the coming days amid supply disruptions following lockdown in the country. Flour millers who process wheat to make atta, maida and suji are operating at 25 -30% of their normal capacity due to labour issue and less supplies of wheat. Though India expects a bumper wheat production this season, harvesting is being delayed following lockdown in the country. How much wheat will be harvested and how much will be officially procured from the farmers will be clear in the coming weeks after further decision is taken when the current lockdown comes to an end on 14th April.

India will be exporting around one lakh tonnes of wheat to Afghanistan and Lebanon under government to government (G2G) arrangement. The country is expecting a record wheat production of 106.21 MMT this year. Despite surplus production, Indian wheat is out of global market due to higher price. But government has been exporting wheat to African and Asian countries on humanitarian ground under G2G arrangement. Nafed has been asked to export 50,000 tonnes to Afghanistan and 40,000 tonnes to Lebanon through diplomatic route according to official sources at the agriculture department.

According to the second advance estimate released by the State of Punjab, wheat production is estimated to decline to 17.9 MMT in 2019-20 (Jul-Jun) compared with 18.3 MMT in the previous year.

As per market sources, wheat stock in central pool as on 1st March'20 stood at 275.21 lakh tonnes down by 9.37% compared to last month. This quantity is higher by around 36.86% compared to last year for the same month. Government has already applied import duty on wheat to curb imports and provide support to domestic prices. Therefore, government has abundant supplies this year to tackle any unexpected rise in wheat prices by selling more quantity in open market.

As per Govt. sources the second crop forecast of India is projected to produce a record 106.2 MMT of wheat crop in 2019-20 because of favourable weather conditions and improve crop yields. Wheat output is expected to go up by 2.5% in the crop year, which is expected to reach 291.9 MMT in 2019-20 from 285.2 MMT last year.

All India weekly average prices declined by 1.23 percent to Rs. 1987.15 per quintal during the week ended 15th April 2020. Wheat average price were ruling at Rs 2011.99 per quintal during 01-08 April 2020. As compared to prices in the week 09-15 April 2019, the prices are lower by 0.80 percent. Prices are expected to trade steady to weak amid lock down in the country. As per the latest update, wheat markets remain closed following lock down in the country amid spread of Covid -19.

International Market Update:

Sudan's government will purchase 200,000 tons of wheat in a deal with the United Nations' World Food Program according to the finance ministry, in a bid to bolster strategic reserves amid the coronavirus pandemic. The northeast African country consumes two million tons of wheat annually, according to official figures, relying heavily on imports.

Ukrainian wheat exports from seaports rose 20% in the week of April 4-10 even as the government tries to retain as much of the grain amid the corona virus crisis according to the preliminary data from the APK-Inform consultancy. It exported 171,000 tonnes of wheat during the period.

According to the latest supply and demand report released by the USDA, wheat exports are reduced by 15 million bushels to 985 million bushels on a slowing pace and prices that have become uncompetitive in many international import markets. The 2019/20 global outlook is for slightly higher supplies, but reduced trade and utilization. Global exports are lowered 0.9 MMT, led by a 1.5 MMT reduction for Russia, which was directly offset by an equivalent increase for the EU. Global imports are reduced 0.3 MMT each for Brazil, Japan, and Uzbekistan; a 0.3 MMT increase for Morocco is partially offsetting. Aggregate world consumption is lowered 5.1 MMT following updates to several countries. With supplies higher and use down, projected 2019/20 global ending stocks are raised 5.6 MMT to a record high 292.8 MMT.

Egypt is planning to import 800,000 tonnes of wheat during this year's harvest season following a request from the President. Egypt, the world's largest wheat buyer, does not normally import wheat during the local harvest but the country is encouraging officials to boost reserves of strategic commodities amid concern about supplies during the new coronavirus outbreak.
