

Wheat Domestic Fundamentals:

According to the state Govt. of Punjab “The Government agencies and private traders have procured 6,67,871 MT of wheat in Punjab on the fifteen day of procurement. The Govt. agencies procured 6,56,561 MT of wheat 2,310 MT has been procured by the private agencies.

According to Haryana state Govt. 31.94 LMT was procured from 3,60,817 farmers in procurement center of Haryana in the last nine days.

According to the FCI latest data this much procurement has been done so far on Tuesday 28.04.2020 Punjab 54.95 LT followed by Haryana 23.81LT, Madhya Pradesh 18.84 LT, Uttar Pradesh 3.87LT, Rajasthan 74721T, Uttarakhand 8309T, Chandigarh 338T, Delhi 13Tm, Himachal Pradesh 652T and Gujrat 60T so far.

Chandigarh wheat shrivelled at many places because of untimely rains, its procurement could be less than the target of 135 lakh metric tonnes (LMT). Which could lead to a fall in procurement by 5-10 LMT. The percentage of shrivelled grain in Patiala, Fatehgarh Sahib and Mohali vary between 15 and 30 per cent.

A glut like situation in wheat markets across Punjab has affected procurement. With no space to unload produce at the local grain market, which is packed to capacity, farmers have not been issued passes for the past two days. With late procurement, payment will get delayed, which in turn will affect the purchase of seeds and fertilisers for kharif sowing. Shortage of labour and poor transportation facility has affected procurement. As on Thursday, 7 lakh metric tonnes of wheat had arrived across the state.

The government has set a procurement target of 40.7 MMT of wheat this season. In Punjab, wheat procurement stood at 6 tonnes as on Wednesday. In Haryana and UP, procurement stood at 22.41 LMT and 2.97 LMT tonnes, respectively.

Farmers in Haryana are storing the harvested crop at home this season as the state authorities have restricted the entry of vehicles to avoid crowding at grain markets. Storing the crop at home and then taking it to the market will involve more labour cost. The farmers are worried to delay harvesting as weather might damage the standing crop.

In Gujarat, procurement of wheat will start on 27 April and is expected to be over by 30 May, 2020. Gujarat is expected to harvest a bumper crop of 40 lakh metric tonnes this season. According to the Union Ministry of Agriculture and Farmers welfare, the total area under wheat crop this season is 310 lakh hectares of which 63-67 per cent has already been harvested. Around 90-95% harvesting of wheat is completed in Madhya Pradesh, 80-85% in Rajasthan, 60-65% in Uttar Pradesh, 30-35% in Haryana and 10-15% in Punjab. Harvesting is likely to be completed in these states by end April.

India will be exporting around one lakh tonnes of wheat to Afghanistan and Lebanon under government to government (G2G) arrangement. The country is expecting a record wheat production of 106.21 MMT this year. Despite surplus production, Indian wheat is out of global market due to higher price. But government has been exporting wheat to African and Asian countries on humanitarian ground under G2G arrangement. Nafed has been asked to export 50,000 tonnes to Afghanistan and 40,000 tonnes to Lebanon through diplomatic route according to official sources at the agriculture department.

As per market sources, wheat stock in central pool as on 1st March'20 stood at 275.21 lakh tonnes down by 9.37% compared to last month. This quantity is higher by around 36.86% compared to last year for the same month. Government has already applied import duty on wheat to curb imports and provide support to domestic prices. Therefore, government has abundant supplies this year to tackle any unexpected rise in wheat prices by selling more quantity in open market.

International Market Update:

Argentina is forecast to harvest a record wheat crop in 2020-21 at 20.2 million tonnes, according to a (GAIN). Argentine farmers are projected to expand wheat area to 6.53 million hectares, a 2% increase over the previous year. If realized it will be the largest planted area in 13 years

Ukraine's wheat exports dropped 37% the week of April 18-24 following a record jump in the previous week, Government officials have said the nation is ready to ban wheat exports if the total exceeds 20.2 million tonnes, According to the data. In the current season, which runs July to June, Exports declined to 215,000 tonnes from 341,000 tonnes Ukraine has already exported 18.8 million tonnes of wheat.

The Russian Agriculture Ministry announced Sunday that it was suspending its export of most grains like wheat until July 1, seemingly ignoring warnings from international organizations who are asking countries not to disrupt global food supply chains during the current COVID-19 pandemic.

Egypt's government has procured 180,000 tonnes of local wheat in the first week of the harvest season for the grain according to the Supply Ministry. Egypt's wheat harvest runs from mid-April until June.

According to APK Inform, a Ukrainian agriculture consultancy, Ukrainian wheat export prices reached a season high of \$232/MT FOB compared to its January high of \$231/MT FOB on increased export demand. USDA expects Ukrainian wheat exports will reach a record 20.5 MMT in 2019/20, 22% greater than last year and 27% more than the 5-year average, if realized.
