

Wheat Domestic Fundamentals:

According to CEO District Cooperative Bank, District Shajapur, "At present, 3,000 metric tonnes of the wheat crop has been damaged in 25-30 wheat procurement centres in Shajapur district. The damage might have happened due to the commencement of monsoon in the state and negligence of contractors or officers." The wheat held in those storage facilities was meant for the purpose of being sent to the fair price shops, but now the whole quantity of the grains has been left rotten.

In Uttar Pradesh, The Meteorological Department had issued an alert on June 24 and 25 expressing the possibility of rain. Even after the alert, the PCF and marketing department did not sleep and wheat remained under the open sky at the purchasing centres. Some wheat remained safe under roofs but wheat was not protected due to lack of space at some purchasing centres.

In view of the increasing infection of the corona virus, due to the lockdown, this time the wheat procurement in the Prayagraj district started from April 15 instead of April 1. After nearly two and a half months have passed, it has become a headache for the marketing department officials to not meet even half of the target set. Due to poor yield, most of the farmers are not going to the purchasing centre to sell wheat this time. At the same time, wheat procurement is being affected due to thinning of wheat due to storms, water and hail.

The government's wheat procurement has touched an all-time record of 38.2 million tonnes so far in the 2020-21 marketing year, with Madhya Pradesh surpassing Punjab as the country's biggest wheat procuring state.

So far, only 30.85 lakh tonnes of wheat have been procured on the MSP in the current rabi marketing from Uttar Pradesh, whereas the target of procurement has been fixed at 55 lakh tonnes. In the last Rabi season, the target was to buy 5.5 million tonnes of wheat from the state, but the purchase was only 37 lakh tonnes. The state government has decided to purchase in the current Rabi season by June 30 due to the corona virus, but given the speed at which the procurement is taking place, the procurement will be less than the target.

In Uttar Pradesh the government may be making continuous efforts to increase wheat procurement, but it is not getting success as per the target. All districts are in the same condition.

Uttar Pradesh, the country's largest wheat producing state, has fallen back in its wheat purchase target this year. The state, which has produced 360 lakh metric tonne of wheat, has so far been able to purchase barely 50% of its target in the ongoing rabi marketing season (2020-21). On June 9, the state has purchased 28.3 lakh metric tonne of the grain from 5,35,670 farmers, who have been paid more than `4,408 crore as minimum support price (MSP) at the rate of `1,925 per quintal.

In the country's largest wheat producing state Uttar Pradesh, wheat production is estimated to increase to 363 lakh tonnes in the current rabi season, but the government procurement target has reached only 50 per cent of the fixed 55 lakh tonnes, which was due to the total procurement last year. Also around 9.40 lakh tonnes is less. The state government has extended the purchase deadline to June 30, but the pace with which the purchase is taking place makes it difficult to reach the target.

According to MP Govt. "Madhya Pradesh has reached first position in the country in procurement of wheat on support price. So far, 1, 27,67,628 metric tonnes of wheat have been procured. This accounts for 33 per cent of wheat procured by all states. Punjab is second to MP," a public relations department official said. He said the total amount of wheat procured in the country stood at 3,86,54,000 metric tonnes.

According to Uttarakhand Govt. Wheat harvesting is going on these days in the mountain. But the weather remains a constant villain in this work. Due to the sudden rains, tenants are facing difficulties in harvesting and mounting wheat.

International Market Update:

Wheat for July delivery fell 0.5% to \$4.81 1/4 a bushel on the Chicago Board of Trade Friday as the weather outlook for the U.S. Corn Belt continues to support crop growth.

China will see a bumper harvest of grains this summer thanks to stable grain acreage and improved crop yields, the Ministry of Agriculture and Rural Affairs said Monday. Summer grain acreage is 400 million mu (about 26.67 million hectares) this year. As of Monday, 90 percent of summer grains have been harvested. The quality of wheat, which is the mainstay of summer grains, has improved and its yield is expected to rise by 4 kg per mu on average, said Han Changfu, minister of agriculture and rural affairs.
