

Wheat Domestic Fundamentals:

According to the data published on the Food Corporation of India (FCI) website, government agencies across the country have purchased 389.44 lakh tonnes of wheat in the current Rabi marketing year 2020-21.

FCI aims to promote increased purchases by private buyers under OMSS, which came down to nil in June, who didn't wish to be identified. The FCI has run out of storage facilities, and needs to offload the excess stock. The wholesale market price of wheat is less than the central agency's rate. Under OMSS, the FCI currently sells 'Grade A' wheat at Rs 2,135/quintal and the 'Grade B' at Rs 2,080/quintal. However, these rates are significantly higher than the current market prices of Rs 1,850-1,920/quintal. Under the scheme can be reduced to Rs 1,640/quintal for 'Grade A'. According to the consumer affairs ministry official wheat price under the scheme can be reduced to Rs 1,640/quintal for 'Grade A'.

In Madhya Pradesh three different co-operatives got drenched in rain due to lack of storage system for purchased wheat from farmers. the employees of the concerned institutions put wheat in yards for grading purpose. Residents living near that area are facing stink issues, due to which they've a punchnama for disposing off unusable wheat.

The Delhi government decided to provide monthly free ration from July to all PDS card holders till November 2020. This particular scheme helps nearly 71,40,938 people who get subsidized food grains. These include 68,465 Antodya Anna Yojna (AAY) households with 2,78,954 beneficiaries. The price is Rs 2 per kg for wheat and Rs 3 per kg for rice, which shall not be charged from the NFS beneficiaries while obtaining the ration from July till November. Regular entitlement under AAY category is 25 kg wheat per household, 10 kg rice per, household and one kg sugar per household.

Uttar Pradesh, has fallen short of its wheat purchase target this year as the agencies could purchase only 35.76 lakh tons of wheat against the set target to purchase 55 lakh tons. Last year the government had purchased 37.04 lakh tons of wheat.

The Haryana government will distribute wheat and pulses free of cost from July to November 2020 under the Pradhan Mantri Garib Kalyan Anna Yojana. The Food Civil Supplies and Consumer Affairs Department made pink, yellow and khaki ration card holders 5 kg per member wheat and one kg pulses per family free per month from April to June 2020 under the scheme in lockdown.

Prime Minister had yesterday announced the extension of Pradhan Mantri Garib Kalyan Ann Yojana till the end of November 2020. He said that the PMGKAY scheme is extended from July till the end of November 2020. the Department of Food and PD has worked out estimated cost under TPDS @ 5 Kg per person per month for three months i.e. April-June, 2020 would entail an estimated subsidy of Rs. 44,131 crore taking the estimated Economic Cost of Rs. 26,838.40/MT for wheat (as per BE 2020-2021).

FCI will now procure wheat at Kota-Bundi on support price till 7 July. The Food-Public Distribution Ministry has issued its orders on Tuesday.

India on Tuesday deployed a helicopter and a dozen drones spraying insecticide to stop desert locusts that have spread to nine heartland states of the world's second-biggest producer of wheat. The move came after swarms invaded Gurugram, India battling its worst desert locust outbreak for decades, pressed into service 12 drones to track the movement of locusts and spray insecticides on the swarms.

As per the Food Corporation of India report dated 28.06.2020, FCI currently has 550.31 LMT wheat.

International Market Update:

Fifty-six percent of the 2020 winter wheat acreage had been harvested by July 5, fourteen percentage points ahead of last year and 1 point ahead of the 5-year average. In Kansas, 80 percent of the state's winter wheat acreage was harvested by July 5, twenty-eight percentage points ahead of last year and 4 points ahead of average. As of July 5, fifty-one percent of the 2020 winter wheat acreage was reported in good to excellent condition, 1 percentage point below the previous week and 13 points below the same time last year.

According to a Ukrainian agriculture consultancy firm. Ukraine is poised to harvest a smaller and poorer quality wheat crop than last year, UkrAgroConsult is forecasting 25.9 million tonnes of production, down from 29.1 million tonnes last year. Crop quality in the northern part of the country will be poor and there is the possibility that will be the case in the west and southwest regions as well. "Intense rain has contributed towards the development of disease, which will negatively affect the quality of the wheat."
