

Wheat Domestic Fundamentals:

As per trade source, India has exported around 64.56 thousand tonnes in the month of August-2020. The quantity in August -2020 was exported at an average FOB of \$ 142.56 per tonne, and the major destinations were Nepal, Bangladesh, Afghanistan, Cambodia, and Jordan. Exports are likely to be at the lower side as other countries can provide quality wheat at competitive prices.

All India's weekly average prices decreased by 1.58 percent YoY to Rs. 1857.70 per quintal during the week ended 15th Sep 2020. Wheat average prices were ruling at Rs 2118.24 per quintal during 9th Sep-15th Sep 2019. As compared to prices in the last week, 1st-8th Sep 2020, the prices are low by 1.58 percent. The wheat market has stabilized, but prices are unlikely to rise till Diwali. But the price of wheat seems to have hit the bottom, and unlikely to drop further.

So far as the government continues to distribute free food grains, the demand for wheat will stay weak, and there is no scope for prices to rise either. The Price of Mill Quality wheat is hovering around between Rs.1650-1750, which may rise by 50-60 Rs. Consumption has also decreased in this season.

According to traders, Wheat prices rose in Jaipur due to firm demand and a fall in arrivals. In Jaipur, arrivals were pegged at 1,000 bags (1 bag = 100 kg), compared with 1,200 bags this week. In Indore, wheat prices were unchanged as demand and supply of the food grain were steady. Arrivals were pegged at 3,000 bags at the market.

Due to good and early rains in the current year, the Kharif sowing began sooner than usual and hence harvesting should also be early and hence rabi sowing can start earlier too. January 2021, could see the arrivals of the new wheat in Gondal Line and some such centers, which usually start in February.

According to traders, Wheat prices rose in Jaipur due to firm demand and a fall in arrivals. In Jaipur, arrivals were pegged at 1,000 bags (1 bag = 100 kg), compared with 1,200 bags on Wednesday. In Indore, wheat prices were unchanged as demand and supply of the food grain were steady. Arrivals were pegged at 3,000 bags at the market.

Government has sold 3390 tonnes of wheat in OMSS through E-Auctions in the First week of September'20. No rakes were sold. No purchase by state Government only bulk consumers bought 3390 tonnes of wheat respectively.

Indian FoB quote is hovering around \$236.03 per tonne while Russia, Ukraine, France, US and Australia are offering wheat at \$199.29, \$200.50, Euro 185.88, \$229.90 and \$229.28 per tonne respectively. There is little hope for recovery on the export front this year. However, India is expected to import around up to 4 thousand tonnes in MY 2019-20.

International Market Update:

Reuters reported that recent precipitation in Argentina has helped revive the country's drought-stricken wheat crop. "The rains arrived just in time to put a floor under the damage that was being done to wheat yields," said the Buenos Aires Grain Exchange's (BAGE) chief analyst Esteban Copati. However, USDA reduced its Argentinian wheat production forecast from 20.5 MMT in August to 19.5 MMT in September, slightly lower than last year, if realized.

In its September World Agricultural Supply and Demand Estimates report, USDA increased its production forecasts for Australia and Canada. Beneficial rainfall over the past several months pulled Australia out of a historic, three-year drought. USDA now forecasts Australian wheat production will reach 28.5 MMT, up 10% from its August prediction and 87% more than the country's 2019/20 output, if realized. Total Canadian wheat production is expected to reach 36.0 MMT, up 6% from USDA's August forecast and up 11% from last year, if realized.

According to the Buenos Aires Grains Exchange, Argentine wheat was refreshed by rains on the Pampas grains belt last week but remained in need of more moisture if yields are to recover from a months-long dry spell.

The 2020 U.S. HRW and SRW harvests are officially complete and preparations for the 2021 crop have now begun. The PNW SW harvest made strong progress this week on favorable field conditions. Farmers in Washington have harvested 88% of the expected SW crop. Idaho's SW crop is 94% harvested and Oregon's SW harvest is now complete.

According to Agritel, a European agriculture consultancy, French soft (non-durum) wheat production is expected to fall 25% on the year to 29.5 MMT following an overly wet fall in 2019 and an extremely dry growing season throughout 2020. The consultancy believes the drop in production could result in a 40% decrease in French soft wheat exports in marketing year 2020/21.

According to Ukrainian grain traders union UGA said the country's 2020 wheat crop output at 26.6 million tonnes.
