

**Wheat Domestic Fundamentals:**

**Wheat is being distributed in the PMGKAY scheme all over India and other schemes in Madhya Pradesh and other states, due to which the price of wheat has been reduced by Rs 400-500. Usually, wheat prices rise in September, but this time the situation is different. Wheat sales through OMSS also got weakened this season. Wheat markets can be in a prolonged slump environment.**

**As per trade source, India has exported around 64.56 thousand tonnes in the month of August-2020. The quantity in August -2020 was exported at an average FOB of \$ 142.56 per tonne, and the major destinations were Nepal, Bangladesh, Afghanistan, Cambodia, and Jordan. Exports are likely to be at the lower side as other countries can provide quality wheat at competitive prices.**

**All India's weekly average prices decreased by 1.58 percent YoY to Rs. 1857.70 per quintal during the week ended 15th Sep 2020. Wheat average prices were ruling at Rs 2118.24 per quintal during 9<sup>th</sup> Sep-15<sup>th</sup> Sep 2019. As compared to prices in the last week, 1<sup>st</sup>-8<sup>th</sup> Sep 2020, the prices are low by 1.58 percent. The wheat market has stabilized, but prices are unlikely to rise till Diwali. But the price of wheat seems to have hit the bottom, and unlikely to drop further.**

**So far as the government continues to distribute free food grains, the demand for wheat will stay weak, and there is no scope for prices to rise either. The Price of Mill Quality wheat is hovering around between Rs.1650-1750, which may rise by 50-60 Rs. Consumption has also decreased in this season.**

**According to traders, Wheat prices rose in Jaipur due to firm demand and a fall in arrivals. In Jaipur, arrivals were pegged at 1,000 bags (1 bag = 100 kg), compared with 1,200 bags this week. In Indore, wheat prices were unchanged as demand and supply of the food grain were steady. Arrivals were pegged at 3,000 bags at the market.**

**Due to good and early rains in the current year, the Kharif sowing began sooner than usual and hence harvesting should also be early and hence rabi sowing can start earlier too. January 2021, could see the arrivals of the new wheat in Gondal Line and some such centers, which usually start in February.**

**Government has sold 3390 tonnes of wheat in OMSS through E-Auctions in the First week of September'20. No rakes were sold. No purchase by state Government only bulk consumers bought 3390 tonnes of wheat respectively.**

**Indian FoB quote is hovering around \$236.03 per tonne while Russia, Ukraine, France, US and Australia are offering wheat at \$199.29, \$200.50, Euro 185.88, \$229.90 and \$229.28 per tonne respectively. There is little hope for recovery on the export front this year. However, India is expected to import around up to 4 thousand tonnes in MY 2019-20.**

**International Market Update:**

**According to GASC, Egypt's state grain buyer bought 235,000 tonnes of wheat at its latest international purchasing tender on Wednesday. The wheat is of Polish and Russian origin.**

**Jordan's state grains buyer purchased 120,000 tonnes of hard milling wheat sourced from optional origins in a tender that closed on Wednesday. 60,000 tonnes were bought from trading house Ameropa at \$254.50 a tonne c&f for shipment in the first half of November. Another 60,000 tonnes was bought from trading house Aston at \$254.90 a tonne c&f also for shipment in the first half of November.**

**Reuters reported that recent precipitation in Argentina has helped revive the country's drought-stricken wheat crop. "The rains arrived just in time to put a floor under the damage that was being done to wheat yields," said the Buenos Aires Grain Exchange's (BAGE) chief analyst Esteban Copati. However, USDA reduced its Argentinian wheat production forecast from 20.5 MMT in August to 19.5 MMT in September, slightly lower than last year, if realized.**

**In its September World Agricultural Supply and Demand Estimates report, USDA increased its production forecasts for Australia and Canada. Beneficial rainfall over the past several months pulled Australia out of a historic, three-year drought. USDA now forecasts Australian wheat production will reach 28.5 MMT, up 10% from its August prediction and 87% more than the country's 2019/20 output, if realized. Total Canadian wheat production is expected to reach 36.0 MMT, up 6% from USDA's August forecast and up 11% from last year, if realized.**

**According to the Buenos Aires Grains Exchange, Argentine wheat was refreshed by rains on the Pampas grains belt last week but remained in need of more moisture if yields are to recover from a months-long dry spell.**

**The 2020 U.S. HRW and SRW harvests are officially complete and preparations for the 2021 crop have now begun.**
