

Wheat Domestic Fundamentals:

Wheat's Prices fell for the second straight day in Indore as arrivals doubled amid a slump in demand, traders said. The food grain's arrival was 4,000 bags (1 bag = 100 kg) in Indore, compared with 2,000 bags on Monday. Wheat prices rose in Jaipur today due to firm demand amid steady arrivals. In Jaipur, arrivals were unchanged at 1,000 bags.

Changes in the weather system and the prices of crops directly impact the sowing of Rabi. Due to this, the trend of farmers of the Rajasthan state has reduced towards wheat in the last five years. Instead, the trend of farmers has increased towards the production of Gram. Officials of the agriculture department are also putting up mini kits and exhibitions of Gram instead of wheat. Simultaneously, the trend has also changed due to the sowing affected due to the lack of a favourable environment at the time of sowing.

On Monday, India Government hiked the minimum support price of wheat by Rs 50 per quintal to Rs 1,975 per quintal to encourage farmers to increase crop cultivation. The decision was taken at a meeting of the Cabinet Committee on Economic Affairs chaired by Prime Minister and Agriculture Minister announced it in Lok Sabha.

All India's weekly average prices decreased by 15.74 percent YoY to Rs. 1788.49 per quintal during the week ended 23rd Sep 2020. Wheat average prices were ruling at Rs 2122.49 per quintal during 16th Sep-23rd Sep 2019. As compared to prices in the last week, 9th-15th Sep 2020, the prices are low by 3.73 percent. The wheat market has stabilized, but prices are unlikely to rise till Dusshera & Diwali festival. But the prices of wheat seem to have hit bottom, and unlikely to drop further.

As per FCI food grains stock, wheat stock in the central pool as on 1st September'20 stood at 478.32 lakh tonnes, down by 7.3% compared to last month. This quantity is higher by around 13.25% compared to the previous year for the same month.

Wheat is being distributed in the PMGKAY scheme all over India and other schemes in Madhya Pradesh and other states, due to which the price of wheat has been reduced by Rs 400-500. Usually, wheat prices rise in September, but this time the situation is different. Wheat sales through OMSS also got weakened this season. Wheat markets can be in a prolonged slump environment.

As per trade source, India has exported around 64.56 thousand tonnes in the month of August-2020. The quantity in August -2020 was exported at an average FOB of \$ 142.56 per tonne, and the major destinations were Nepal, Bangladesh, Afghanistan, Cambodia, and Jordan. Exports are likely to be at the lower side as other countries can provide quality wheat at competitive prices.

So far as the government continues to distribute free food grains, the demand for wheat will stay weak, and there is no scope for prices to rise either. The Price of Mill Quality wheat is hovering around between Rs.1650-1750, which may rise by 50-60 Rs. Consumption has also decreased in this season.

Due to good and early rains in the current year, the Kharif sowing began sooner than usual and hence harvesting should also be early and hence rabi sowing can start earlier too. January 2021, could see the arrivals of the new wheat in Gondal Line and some such centers, which usually start in February.

The government has sold 60830 tonnes of wheat in OMSS through E-Auctions in the third week of September'20. Till now; no rakes have been sold. Sale of wheat to bulk consumer 10830 and sale of Wheat to state Govt. 50000.

International Market Update:

According to GASC, Egypt's state grain buyer bought 235,000 tonnes of wheat at its latest international purchasing tender on Wednesday. The wheat is of Polish and Russian origin.

Jordan's state grains buyer purchased 120,000 tonnes of hard milling wheat sourced from optional origins in a tender that closed on Wednesday. 60,000 tonnes were bought from trading house Ameropa at \$254.50 a tonne c&f for shipment in the first half of November. Another 60,000 tonnes was bought from trading house Aston at \$254.90 a tonne c&f also for shipment in the first half of November.

Reuters reported that recent precipitation in Argentina has helped revive the country's drought-stricken wheat crop. "The rains arrived just in time to put a floor under the damage that was being done to wheat yields," said the Buenos Aires Grain Exchange's (BAGE) chief analyst Esteban Copati. However, USDA reduced its Argentinian wheat production forecast from 20.5 MMT in August to 19.5 MMT in September, slightly lower than last year, if realized.
