

Wheat Domestic Fundamentals:

According to traders, Prices of Wheat were steady in Indore due to a rise in bulk demand and supply, traders said. Arrivals were pegged at 6,000 bags (1 bag = 100 kg), as against 4,000 bags on Monday. In Jaipur, too, prices were flat amid steady arrivals and demand, the traders said. Arrivals were steady at 5,000 bags.

As per latest update, area sown until 06th November-20 is 16.94 lakh hectares compared to 9.72 lakh hectare in the previous Rabi season. The normal area is 305.58 lakh hectares.

All India's weekly average prices decreased by 11.01 percent to Rs. 1827.84 per quintal during the week ended 15th Nov 2020. Wheat average prices were ruling at Rs 2229.07 per quintal during 09th - 15th Nov 2019. The wheat market has stabilized, and prices are likely to rise in the coming weeks due to festivals and higher export. The wheat prices are unlikely to drop much further because the PMGKY scheme may be discontinued in November as there's no official announcement that it will continue after November, so far.

Sowing of Rabi crops is going on in full swing across the country. Along with this, the government has recently announced good news for the farmers. Rajasthan's state government has decided to provide certified seeds to the farmers of the state at a 50 percent discount from the prescribed rate. For this, preparations have started to sell wheat seeds to reach up to rural service cooperative societies.

According to a Government official, the food ministry has proposed to halve the allocation of free rice and wheat to 2.5 kg per month but keep pulses at 1 kg. The food ministry has suggested tweaks in the free food grain plan, including a reduction in allocations, after the finance ministry indicated it is not keen on extending the scheme beyond November because of the strained fiscal situation. The food ministry has also proposed monthly extensions to the plan after reviewing the budgetary situation

The effect of stopping the wheels of goods trains in Punjab will affect the sowing of wheat. The agriculture department has only 7% Urea and 71% DAP fertilizer stock left. If trains do not run in time, farmers will not get Urea and DAP fertilizer. In such a situation, farmers may face difficulties in sowing wheat this year.

On Sunday, the Punjab government approved Wheat Seed Subsidy Policy-2020-21 of the Agriculture Department to provide certified wheat seed at 50% subsidy to farmers in the Rabi season. A total of 1.85 lakh quintals of certified seed, with Rs 18.50 crore worth of subsidy, will directly benefit approximately 2.5 lakh farmers under the policy.

As the government looks to liquidate its mounting stocks of wheat, flour millers have advised it to lower the rate at which wheat is sold for open market operations by Rs 500 a quintal. It sells its good quality wheat at Rs 2,135 a quintal and luster loss wheat at Rs 2,080 a quintal. Flour millers are demanding a further reduction of Rs 500/quintal in this price as it has not been revised since last December.

The central government may soon announce to carry forward the scheme till March of giving ration to the country's poor people for free under the Pradhan Mantri Garib Kalyan Yojana. If Govt. increases the scheme till next year then prices are going to impact.

According to the traders, there are low chances of any downward movement in wheat in the coming days as the impact of the Covid-19 is diminishing, and economic activity is improving. The scheme of free wheat and rice can be extended further, which will impact the prices from the current level, while prices in mandis are increasing now due to less supply from FCI and low arrivals in mandis.

International Market Update:

Prices of Australian wheat offered in Asia slid this week below Black Sea values for the first time in at least four years, with the country forecast to harvest a near-record crop. Australia Premium White (APW) wheat is being quoted at \$275 a tonne, including (C&F), compared with a similar quality of Black Sea wheat at \$285 a tonne. Price is likely to drop further as the crop looks good. For the first quarter, Asian wheat buyers will shift to Australia because Prices are cheaper, and the quality is good.

In Pakistan, Economic Coordination Committee (ECC) has decided to propose to the Cabinet Rs 1600 as minimum support price (MSP) for wheat crop for fiscal year 2020-2021.
