

Wheat Domestic Fundamentals:

Due to the Diwali festival, mostly mandis were closed on the 13th and 14th of November.

A day after Diwali, rain lashed parts of Punjab, Chandigarh, Delhi, Haryana, and Uttar Pradesh. Several areas witnessed shower and thunderstorm due to a western disturbance. Parts of Punjab and Haryana also witnessed a hailstorm leading to a fall in temperature. Light rains and thundershowers in Punjab parts have brought cheers to the farmers—especially the wheat growers, who had sown their crops without burning the paddy straw. Apart from this, it is also beneficial for those preparing to sow wheat, and other rabi crops, including fodder for animals.

Punjab could be staring at a much bigger crisis if it does not immediately get the much-needed fertilizers for the wheat crop. As farmers stare at a severe shortage, in the wake of the suspension of rail services in the state and rakes of fertilizers stuck outside, they resort to desperate measures to ensure a steady supply. From buying urea at much higher rates (Rs 325-350 per kg against a cost of Rs 265) to rushing to neighboring states of Haryana and Rajasthan, farmers are desperately trying to ensure that their wheat crop gets cultivated successfully. The state immediately needs vast quantities of urea and di ammonium phosphate (DAP) for the wheat crop, which has already started sowing. Wheat is expected to be cultivated on almost 35 lakh hectares in the state. Punjab needs nearly 19 lakh quintals of DAP and 8 lakh tonnes of urea for this wheat season. "DAP is used at the time of sowing, while urea is to be applied three weeks after sowing.

Demand in wheat products remains weak despite the festive season, so its prices are not improving. According to traders, the wheat business has not yet come out of the recession environment due to limited demand of flour mills as there is a concern about the government's policies.

All India's weekly average prices decreased by 11.01 percent to Rs. 1827.84 per quintal during the week ended 15th Nov 2020. Wheat average prices were ruling at Rs 2229.07 per quintal during 09th - 15th Nov 2019. The wheat market has stabilized, and prices are likely to rise in the coming weeks due to festivals and higher export. The wheat prices are unlikely to drop much further because the PMGKY scheme may be discontinued in November as there's no official announcement that it will continue after November, so far.

Sowing of Rabi crops is going on in full swing across the country. Along with this, the government has recently announced good news for the farmers. Rajasthan's state government has decided to provide certified seeds to the farmers of the state at a 50 percent discount from the prescribed rate. For this, preparations have started to sell wheat seeds to reach up to rural service cooperative societies.

According to a Government official, the food ministry has proposed to halve the allocation of free rice and wheat to 2.5 kg per month but keep pulses at 1 kg. The food ministry has suggested tweaks in the free food grain plan, including a reduction in allocations, after the finance ministry indicated it is not keen on extending the scheme beyond November because of the strained fiscal situation. The food ministry has also proposed monthly extensions to the plan after reviewing the budgetary situation

International Market Update:

Argentina's wheat harvest is seen at 16.7 million tonnes, slightly down from the previous 17 million tonne estimate due to a prolonged drought, the Rosario Grains Exchange (BCR) said.

Prices of Australian wheat offered in Asia slid this week below Black Sea values for the first time in at least four years, with the country forecast to harvest a near-record crop. Australia Premium White (APW) wheat is being quoted at \$275 a tonne, including (C&F), compared with a similar quality of Black Sea wheat at \$285 a tonne. Price is likely to drop further as the crop looks good. For the first quarter, Asian wheat buyers will shift to Australia because Prices are cheaper, and the quality is good.

In Pakistan, Economic Coordination Committee (ECC) has decided to propose to the Cabinet Rs 1600 as minimum support price (MSP) for wheat crop for fiscal year 2020-2021.

Argentine farmers are expected to harvest 16.8 million tonnes of wheat this season, the Buenos Aires Grains Exchange said in its weekly crop report on Thursday, citing months of dry weather as its reason for cutting its previous 17.5 million tonne estimate. Argentine wheat is harvested in December and January, with most of each crop exported to neighboring Brazil.

The Ukrainian wheat market was slow with a low buying interest. Offers for 11.5% protein wheat FOB Ukraine Panamax ports December loading were heard at \$259/mt
