

Wheat Domestic Fundamentals:

With the farmers protesting at the Delhi/NCR borders against the three new farm laws, wheat cultivation back home in their States of Punjab, Haryana, and Rajasthan has taken a hit in the current rabi season. States like Madhya Pradesh and Maharashtra, from where not many farmers have participated in the protests, have sown more wheat or rabi crops this year.

As per latest update, area sown to wheat, has increased marginally by 2.53% to 254.73 lakh hectares so far in the ongoing 2020-21 rabi season from 248.44 lakh hectares in the year-ago period. The overall trend of rabi sowing progress is excellent with increased area coverage has been recorded.

According to traders, Prices of Wheat in the Indore were steady today as both demand and arrivals fell, traders said. Arrivals were pegged at 5,000 bags (1 bag = 100 kg) from 7,000 bags on Monday. In Jaipur, too, prices were unchanged due to subdued supply and a decline in demand from bulk buyers, traders said. Arrivals were pegged lower at 1,500 bags against 1,700 bags on Monday. However, the outlook is bullish as retail demand from end consumers is likely to pick up as the government's scheme to provide free food grain to beneficiaries of the public distribution system ended in November.

The government has asked the three key wheat-procuring states to create 8 MMT temporary 'covered, and plinth' storage, one of the officials said. Punjab has been asked to add 4.0 million tonnes of space, while Haryana and Uttar Pradesh will add 3.0 million tonnes and 1.0 million tonnes, respectively. Looking at the storage space in Punjab and Haryana, it is necessary to get more space before we run out of capacity as these two states are major contributors of both rice and wheat to the central pool," an official said.

Indian traders have signed two deals to export around 200,000 tonnes of wheat to Bangladesh. According to market sources, The traders are exporting wheat at \$210-\$220 per tonnes, FOB, and \$250-\$260 per tonnes, free on board, under the two deals in the coming few weeks. The export price of Indian wheat has been falling as domestic prices have weakened over the past few months.

Over 46 lakh hectares of wheat sowing have been complete in Madhya Pradesh after favorable conditions for the state's rabi crops. This year, the target for sowing rabi crops has been increasing by about 2 lakh hectares. The agriculture minister said sowing of wheat was completed in 46.74 lakh hectares area till November 23, almost 10 lakh hectare more than last year when the farmers could complete wheat sowing only in 37.27 lakh hectares of land.

The Wheat market saw a deep impact of the rumor, according to which the Central Government has extended the period of free grain distribution till March 2021 under the Public Distribution System (PDFS), which leads price down on Wednesday. Similarly, the scheme is coming to an end in November 2020 and still, there's no official confirmation from the government so far.

According to Government, Wheat stored in the Punjab and Haryana needs to shift out to make space for rice. These two states particularly have huge wheat stocks, and all of them cannot be moved out to the existing CAP (covered and plinth). So we are planning to ask some states to create more storage space, "It has become necessary for the Centre to move the Wheat as FCI has a high surplus of Wheat in the central pool. As of Oct 1, the government's Wheat stocks were at 43.70 MMT.

As per trade source, India has Import around 6380 MT in the month of October-2020 after March-2020. The quantity in October-2020 was imported at an average FOB of \$ 304.90 per tonnes.

International Market Update:

World wheat prices remained firm this month, mostly due to dry weather impacting the start of the growing season in the Northern Hemisphere and unfavorable production conditions in Argentina. Strong global export demand drove further price spikes in Canada, European Union, Russia, and the United States, demonstrated by robust export sales reports this month. Concerns about the rise in COVID-19 infections worldwide and recent rains in Russia and the U.S. Plains softened price increases more recently.

Australian numbers updates from local analysts wheat crop expectations rise to 35 MMT. Australia in October 2020 exported only 367.6 thousand MT of Wheat, which is 17% less than in September and the worst October export since 2007.
