

Wheat Domestic Fundamentals:

During April- December 2020 period, India's export of Wheat rose to Rs 1,870 crore (252 US\$ Million) against was Rs. 336 crores (48 US\$ Million) reported during the same phase a year back. As per the trend, there is a growth of 456.41% in Rupee term and 431.10 % Dollar terms. The share of export of wheat is 1.84 % in the total export of APEDA scheduled products. The key exports destination for wheat includes Nepal, Bangladesh, United Arab Emirates.

According to the trade source, Due to the sudden change in the weather, the temperature has started increasing gradually. Strong sunlight in the day is making you feel warm. The concern of wheat producing farmers has increased. Similarly, if the temperature increases, wheat production will decline. The late wheat crop will collapse.

In Madhya Pradesh, registration for procurement of wheat is currently in progress, which will run till February 20. All arrangements are being made in the state for timely procurement of crop in the interest of farmers. Wheat will be procured from March 22 in Indore and Ujjain divisions in MP and from April 1 in the remaining divisions. Around 4529 procurement centres are being set up across the state.

All India's weekly average prices increased by 10.55 percent to Rs. 1962.67 per quintal during the week ended 08th Feb 2021. Wheat average prices were ruling at Rs 2317.41 per quintal during 01st-08th Feb 2020. It is unlikely that any slowdown in the wheat market and prices will increase for a longer period. Prices will remain high as the wheat crop is expected to decrease this year.

The wheat crop is expected to be good this year. The standing crop is getting cold at present, and due to the favorable environment, the harvest will be good in Gujarat. The sowing has been reduced, but there will not be a very big decline. The wheat price is hovering from ₹ 1810 to 1820, which has increased recently. There is no circumstance to see the price going below ₹ 1800 in the coming days. If the amount is too low, then the market can go down.

Prices will go up in the wheat market in the long term, but this year the major basis has been on the fluctuation of Chicago futures. In the new season, wheat exports are expected to go from 10 lakh tonnes to 40 lakh tonnes. The export of wheat will remain the same throughout the year.

FCI has stocked up to 3 million tonnes of URS quality, which is in Punjab - Haryana but will run out in two months. After that, the market can improve.

In Kota, the price of mill quality wheat is running around Rs. 1750. Currently, the price is stable at present due to loading problems at Kandla port, lack of space in the warehouse, but as export demand comes out, there will be a recovery from this price, and there will be a rise of Rs. 100 to 150 per quintal. Export demand in wheat is expected to be good. Depending on the global market price, there will be export trade, and the market will depend on it. In Rajasthan, the old stock of wheat is no longer left. The same stock is left, which is normal.

The Uttar Pradesh government has increased the MSP for wheat to Rs 1975 per quintal. In a way, this year, Rs 50 has been increased more than the MSP of last year. Government procurement of wheat in Uttar Pradesh is going to start from April 1.

As per the latest update, the area under wheat has increased marginally by 3.03% to 345.14 lakh hectares so far in the ongoing 2020-21 Rabi season from 334.68 lakh hectares year-ago same period. Rabi sowing progress's overall trend is excellent, with increased area coverage recorded due to favourable weather. Thus, 10.46 lakh ha more area has been covered compared to last year.

International Market Update:

According to SovEcon, Russia's new permanent wheat export tax may backfire. Russia announced its plans to implement a new floating permanent tax on June 2. The tax will be 70 percent of the difference between the export price and US\$200 per tonne. So if the export price is \$300, that would amount to a \$70 tax. The goal is to bolster domestic supplies of the crop and cool off prices. A permanent floating duty on wheat exports from Russia, which will impose from June 2, may lead to a decrease in wheat production as the new export tax calculation mechanism would be based on market price benchmarks rather than production costs.

Ukrainian soft milling wheat export prices have fallen by \$10-\$11 per tonne over the past week, mainly due to a jump in Russian grain exports ahead of forthcoming exports restrictions, APK-Inform agriculture consultancy said on Monday. Asking prices for Ukrainian-origin 12.5% protein wheat stood at \$280 to \$288 per tonne FOB Black Sea, the consultancy said in a report. Lower quality 11.5% wheat quoted between \$278 and \$286 per tonne
