Wheat Domestic Market Fundamentals: -

All India average wheat price recovered once again and increased by 1.62 percent to Rs 1801.05 per qtl. during the week ended 23rd July-2016..Wheat average price was ruling at Rs 1772.26 per qtl in the second week of July. Arrival continues to decrease and private buyers remain active above Rs 1700-Rs1725 per qtl..All India average price is higher by 7.71 % in comparison to price (Rs 1672.11 per qtl.) registered in the third week of July, 2015. Overall trend in cash market is expected to remain steady to slightly firm as demand for wheat products is likely to increase ahead of festive season.

Unchanged import duty structure would force south Indian millers to source wheat from central and north India to some extent. However, weak global market due to ample availability in black sea region, US, Australia, France, Canada and Argentina has encouraged south Indian millers to continue import despite 25% import duty and regular release from central pool stock through auction. Wheat price in black sea region has decreased to \$165 per tonne. If millers add freight and insurance cost (around \$25 per tonne) it brings total landed costing at \$190 per tonne at Tuticorin port. With 25 percent duty total cost for millers comes to Rs 15200 per tonne at their premises in Kerala. When they source it from domestic markets, total costing comes to Rs19000 per tonne. So, import is likely to continue.

India exported 648.51 tonne wheat during week ended 17th, July-2016 from Mundra port..Major buyers were Somalia, UAE, Tanzania and UK.. Wheat has been exported at an average FoB of \$339.42 per tonne. Malaysia, .Wheat export decreased by 81.29 percent last week from 3466.31 to 648.51 tonne. As parity is not in favor of Indian exporters, export volume would remain negligible in coming weeks.

Wheat import in India begins in month of July-2016. The first consignment landed at Tuticorin port in the second week of July. The quantity in question was 11,000 T sourced from Ukraine at an average CiF of \$191.94 per tonne. The second consignment of 18495.575 tonne landed at same port from same origin in the third week of July. The CiF value remains same as first one. One more vessels is expected this month.

Total wheat procurement for the season is around 23MMT and season is over now. Despite lower production govt. has sufficient stock to take care of market need .Off-take from central pool stock would increase as prices in domestic market would continue to get firmer. Millers may turn to central pool stock as supply in cash market would continue to be thinner. Sale from central pool through auction began having reserve price of Rs 1640 per qtl. Dedicated sales in procuring region may start July onward.

Agriwatch has revised its wheat production estimate down from 89.28 to 87.20 MMT In end May-2016. Carryout for next year would decrease from 15.38 to 12.58 MMT. Availability would be lower at 104.58 MMT for the current year. Consumption would remain same as last year.

Agricultural Statistics Division, Directorate of Economics & Statistics (DES) has released Third Adv. Estimate for Rabi crop for 2015-16 on 9th May, 2016. Production target for wheat in Rabi had been set at 94.75 lakh tonne for 2015-16 crop year. Now in Third Adv. estimate wheat production estimate has been revised up from 93.82 lakh tonne to 94.04 MMT.

Latest Developments In Domestic Markets : -

South Indian millers have imported 18,495.57 tonne wheat from Ukraine, landed at Tuticorin port last week at CiF value of \$191.92 per tonne. More vessels are expected next week from France/Ukraine.

Rake loading from Rajasthan to Bangalore is being reported at 2090 per qtl. As demand continues, prices in domestic market is likely to trade stable to slightly firm despite import and release from central pool stock through various channels.

Outlook & Recommendation: -Wheat cash market is expected to trade steady to slightly firm in July.

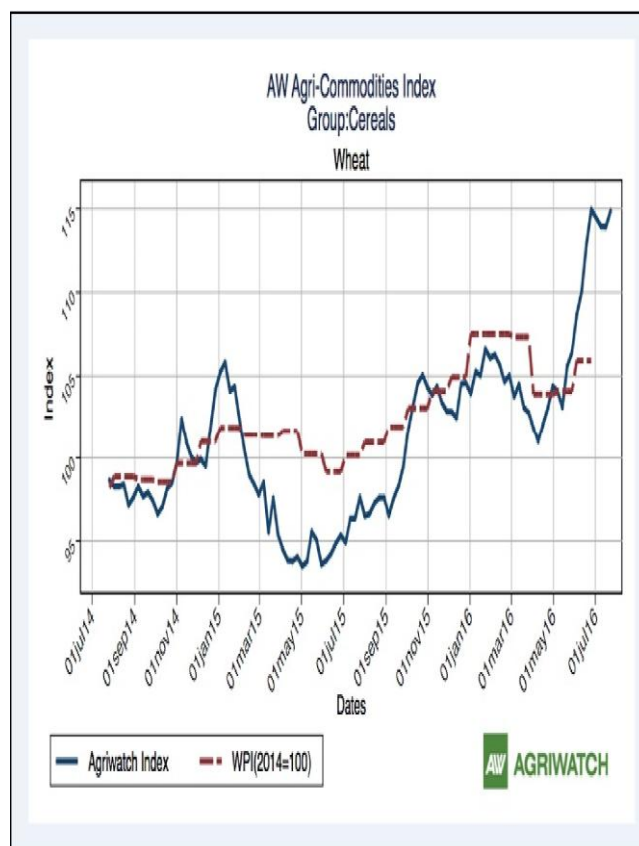

Trade Call: Stakeholders should trade in August contract taking care of lower and upper price tag of Rs1740 & 1760 respectively.

Agriwatch Cereals Index:

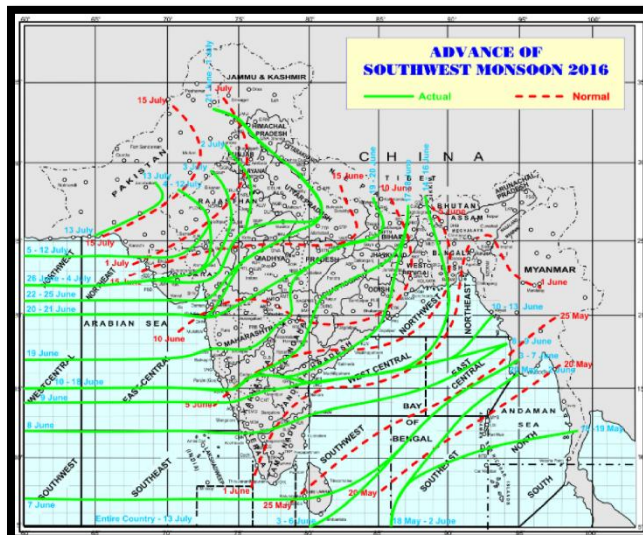

The Agriwatch Agri Commodities Index dipped 0.2% to 121.47 during the week ended July 23, 2016 from 121.71 during the previous week, breaking a 7-week gaining streak during which it surged 9.8%. The base for the Index and all sub-Indices is 2014 (= 100).

Significant declines in vegetables, pulses and fibres offset gains in the other 6 commodity group sub-Indices in the main Index. The commodity group sub-Index values and their weekly changes are as follows: Cereals Index: 108.43 (+0.36%), Pulses Index: 221.59 (-2.42%), Vegetables Index: 83.57 (-6.49%), Edible Oils Index: 115.96 (+1.32%), Spices Index: 143.45 (+0.55%), Fibres Index: 116.94 (-4.04%), Sweeteners Index: 121.62 (+0.66%), Oilseeds Index: 115.72 (+1.35%) and Other Non-Food Articles Index: 91.89 (+1.1%). The sub-Index charts can be viewed on the ET website and on Agriwatch.com.

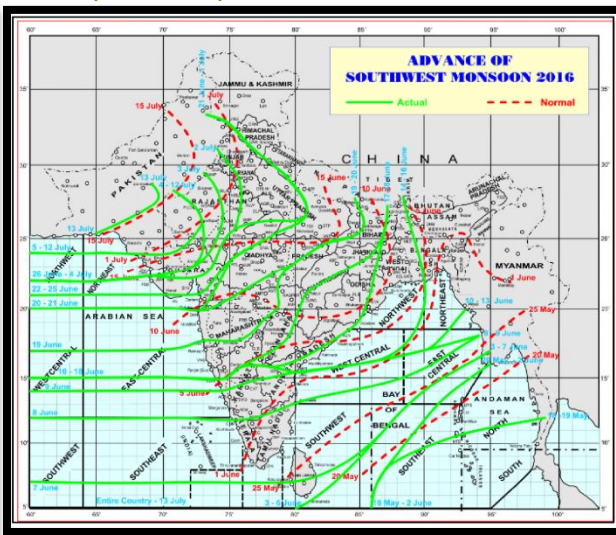

"Agriwatch has recently launched its AW Agri Commodity Indices to enable organizations access independent Indices to track and use to benchmark their purchases and sales. The Indices are based on the daily prices in the key benchmark markets for each commodity that AW has been covering for the past decade. The indices include an Aggregate Index, Category Indices and individual commodity indices. The weekly indices are free to access on our website www.agriwatch.com. The daily indices are available on subscription. Please contact for more details."

Weather Condition& Monsoon Progress: Last week 18.07.2016

This week(22.07.2016)

Southwest monsoon was vigorous over North Interior Karnataka and active over Sub Himalayan West Bengal & Sikkim, Konkan & Goa and Rayalaseema. Heavy to very heavy rainfall occurred at isolated places over Arunachal Pradesh; heavy at isolated places over Uttar Pradesh, Bihar, Gangetic West Bengal, Assam & Meghalaya, East Madhya Pradesh, Chhattisgarh, Vidarbha, Konkan & Goa and Karnataka

Wheat Weekly Ave Price Chart:

Wheat average mill delivery prices increased slightly in Indore & Kota week on week basis, while it decreased in Ahmadabad and Delhi. Cash market is likely to trade stable to firm in coming weeks. South Indian demand for wheat may decrease with the commencement of import by south Indian millers.

As arrivals have decreased considerably any major dip from current level is unlikely. Agriwatch expects stable to firm market in July. However, release from central pool stock and import may cap one way uptrend in the weeks ahead.

In Sasaram, Arah and Buxar major buyers are active and offering price at the rate of Rs 1720.1735 per qtl. Concern over supply front for FAQ variety in coming weeks may continue despite govt.'s effort to ease supply side.

Wheat Stock Norms

1st Oct.	82.5	175.2	257.7	20	30	307.7
1st Jan	56.1	108	164.1	20	30	214.1
Buffer Norms w.e.f. 22.01.2015						

Procurement As on 28th June-2016:

State	Total Procurement In Marketing Season 2015-16(April To March)	Progressive Procurement As on 28.06.2016(Fig In Lakh Tonne)		
		In Marketing Season 2016-17	In Marketing Season 2015-16	% Ch Over Previous Year
Punjab	103.54	106.44	103.54	2.80
Haryana	67.78	67.22	67.78	-0.83
Gujarat	0.73	0.00109	0.73	-99.85
Uttar Pradesh	22.67	8.2376	22.67	-63.66
MP	73.09	39.9	73.09	-45.41
Rajasthan	13	7.617	13	-41.40
Others	0.07	0.02	0.07	-71.43
All India	280.88	229.44	280.88	-18.32

Total wheat procurement was registered at 229.44 lakh tonne till 28th June -2016. Against set target of 30 MMT total procurement may end up with 23 MMT this year. Till date it is lower by 18.32 % from last year.

FOB Quote For Wheat At Kandla:

Wheat FoB quote in India has eased slightly with eased price in global market and govt.'s intention to augment supply in domestic market from central pool stock. However, any major dip is unlikely despite weak global market.

Prices of wheat may stay steady at current level. Supply demand side seems balanced despite lower arrivals and farmer's retention. of higher percentage of marketable surplus this year in anticipation of higher price in lean season.

With unchanged duty there is much scope for firmness in coming weeks. Import starts and second consignment of 18,495 T arrived at Cochin ,at 17th, July-2016 at same price(\$191.94 per tonne).

Wheat Export Weekly Data:

Wheat export volume has been negligible during last few weeks and there is no hope for any major recovery in coming weeks as disparity continues to discourage exporters..

India exported 648.51 tonnes of wheat during week ended 17th July-2016, lower by 81.29 percent. Average FoB quote realized last week was \$339.42 per tonne.

As prices are ruling lower in global market export opportunity for Indian wheat exporters seems bleak. Major buyers were Kuwait, Sudan, Sri Lanka ,Nepal and west Asian countries.

Wheat Import:

After 20th March-2016 when 2750 tonne wheat was imported from Australia at CIF of \$ 257.08 per tonne, two consignments of 11,000 & 18,495 tonne respectively landed at Cochin port at CiF value of \$191.94 per tonne. Import is likely to continue as global market, particularly price in black sea region has decreased to \$160 per tonne.

If 25 percent duty is applied on wheat sourced from black sea region, the costing comes to around \$201 per tonne. If other costing from Indian port to local destination is added, it goes up to \$215/16 per tonne. In INR term it comes to Rs 14500 per tonne.

Wheat Technical Analysis:

Wheat – Technical Outlook

August Contract, Expiry: 20 August,2016

Technical Commentary:

- Last candlestick depicts firmness in the market.
- RSI is moving in neutral zone.
- Prices closed above 9 and 18 days EMAs hints firm market.
- Increase in price, volume and OI indicate short build up.

Wheat prices are likely to trade firm in the near term.

Strategy: Buy On Dip

Source::Ministry OfAgriculture

International Market Update:

The U.S. Department of Agriculture earlier this month estimated 2016 global wheat production at about 983 million tons, compared with consumption of 729.3 million tons. Because of increased use of wheat as livestock feed worldwide, however, the glut of wheat is being slowly diminished. With total use rising faster than supplies, world ending stocks are lowered 4.1 million tons to 253.7 million, but remain record large," the USDA report said

According to Thai Commerce Ministry a group of farmers have filed complaints against wheat liberalization policy. Wheat import in Thailand is increasing. It has moved up from 4.93 lakh tonne in 2014 to 3.46MMT in 2015. This year it may touch 5MMT. Increasing wheat import has affected local maize farmers as prices of maize has decreased considerably during last two years.

Russian FoB quote has come down to \$160 while US wheat FoB is being quoted at \$180 per Tonne. Canada is going to harvest bumper crop despite lower area coverage. Yield in Canada is expected to increase by 23 % this year. US and Australia too are expecting bumper crop due to favorable weather condition. However, crop condition in EU is not good, that has provided some relief to the global wheat market.

Wheat harvesting in Black Sea Region has already commenced, Canadian crop is due in one month while Australian crop would hit the market in October. So there is plenty of supply in global market and it would continue to reel under pressure. More downside is expected in coming weeks. Higher acreage in US too would create supply glut. So, global wheat market seems under bear's grip.

Wheat production in Australia is set to increase by 5% year on year basis to 25.4MMT in 2016-17. As per latest update by ABARES. Recent rains in major growing regions are considered beneficial to the standing crop. Crop condition is good to excellent so far. However, IGC forecasts 25MMT wheat, 4 lakh tonne lower than ABARES forecast. If weather remains favorable throughout the season, bumper production seems very much in the sight. Despite slightly lower acreage production would increase due to higher yield expectation.

At export front too Australia is set to ship record wheat in 2016-17 on the back of huge carry out stock and bumper production prospects. As per ABARES update wheat export from Australia would increase by 4 % to 17.2MMT, record in last three years. It has revised its export figure down by 3.33 lakh tonne to 16.93MMT for 2015-16. As price of wheat is ruling lower in global market, overall realization is bound to decrease despite higher export volume.

Strategie Grains left its estimate for this year's soft wheat production in the European Union unchanged from last month but cut its export outlook in 2016/17 on quality concerns and higher supplies from Russia. It has pegged the EU soft wheat harvest at 146.7 million tonnes, down 3 percent on last year's record of almost 151 million tonnes.

However, it has made considerable changes per country with a combined rise of 1.3 million tonnes for Bulgaria, Romania, Spain and Italy offsetting a reduction of 1.3 million tonnes for France and Germany where wet weather last month was expected to have dented yields. The lower projected quality of the crop, in addition to a higher expected exportable supply from Russia, prompted Strategie Grains to cut its 2016/17 EU soft wheat export forecast by 800,000 tonnes to 29.9 million.

Australian Bureau of Agricultural and Resource Economics and Sciences (ABARES) has revised its wheat production estimate for 2016-17 up from 24.4 to 25.4MMT. The new season will end on 1st July-2017. It would be the highest production after 2012-13. Higher wheat output from Australia will add pressure on global prices Wv1, which last week hit a seven-month high on concerns over the outlook for the U.S. crop.

IGC has revised wheat production projection up by 7MMT from 722 to 729 MMT in 1st, July-2016 for crop year 2016-17. According to IGC global wheat production for 2016-17 may touch 729 MMT against 736 forecast for 2015-16. The difference is around 7 MMT from previous year. Lower projection for wheat may lend support to global wheat market at current level and any major dip from current level is unlikely. However, overall trend in global wheat market remains bearish.

IGC Wheat Balance Sheet:

IGC Forecast(Fig-In MMT)	2013-14	2014-15	2015/2016	2016-17 (Proj)	
			Forecast	26.05.2016	01.07.2016
Production	717	730	736	722	729
Trade	157	153	158	154	156
Consumptions	699	717	719	717	720
Carryover stocks	188	201	217	223	226
Y-O-Y change	19	12	17		9
Major Export	54	63	68	70	72

- IGC has revised wheat production projection up by 7MMT from 722 to 729 MMT in 1st, July-2016 for crop year 2016-17. According to IGC global wheat production for 2016-17 may touch 729 MMT against 736 forecast for 2015-16. The difference is around 7 MMT from previous year. Lower projection for wheat may lend support to global wheat market at current level and any major dip from current level is unlikely.
- Trade projection has been revised up by 2MMT to 156 MMT. However it is 2MMT lower from actual of last year.
- Consumption has been pegged at 720 MMT for 2016-17, up by 3MMT from last year.
- Carryout may increase from 223 to 226 in 2016-17. It would ensure ample supply for the global market and continue to affect market sentiments despite lower production by 7MMT from last year.

International FOB Weekly Price Movement (USD/T)

Indian FoB quote is based on local price. There is no export in bulk volume currently. Indian FoB quote is hovering around \$279 to \$280 per tonne.

US and Russian quotes are hovering in the range of \$180 to \$160 per tonne. More dip is unlikely as buyers are expected to return to the market at lower level. Australia offers wheat at \$213 per tonne.

Wheat quotes may hover in the range of \$155 to \$210 due to excess supply in the global market in coming weeks. Australian quote may move down to \$210 per tonne once again.

Global Indicative Wheat FoB(\$/T)

International Weekly Outlook:

Wheat harvesting in Black Sea Region has already commenced, Canadian crop is due in one month while Australian crop would hit the market in October. So there is plenty of supply in global market and it would continue to reel under pressure. More downside is expected in coming weeks. Higher acreage in US too would create supply glut. So, global wheat market seems under bear's grip. Uptrend is unlikely at this point of time.
