- ❖ **International Outlook**

Wheat Domestic Market Fundamentals:-

India is likely to import between 3-4 million tonnes of wheat in 2017-18 despite good production this year due to cheaper availability in international market. As per market sources, India has imported around 1.4 lakh tonnes of Australian wheat in the month of June at Tuticorin port and around 2.8-3.0 lakh tonnes of wheat has already been contracted with Ukrainian suppliers. The major importers are south Indian mills as they find imported wheat cheaper compared to transporting it from North and central India.

As per IMD, India has received cumulative rainfall of 103% of the benchmark LPA. The northwest and central regions have received rainfall with 116% and 113% of the LPA respectively whereas the southern peninsula and east/north-east region have received rainfall with 91% and 90% of the LPA respectively. IMD has further forecasted that rainfall is likely to decrease between July 27 and August 02. The only regions suffering with deficient rains include Kerala, Parts of Karnataka and Tamil Nadu.

All India weekly average prices increased by 4.61 percent to Rs. 1896.14 per quintal during the week ended 23rd July 2017. Wheat average price were ruling at Rs 1812.64 per quintal during 09-15 July 2017. As compared to prices in the week 16th -23rd July 2016, the prices are firm by 5.55 percent. Prices are expected to remain steady to firm in coming days

As per latest update, India has exported 0.72 lakh tonnes of wheat in April-May 2017 compared to 1.09 lakh tonnes in April-May 2016. Whereas on the import front India has imported 2.18 lakh tonnes in April-May 2017 compared to 0.00 lakh tonnes in April-May 2016. Import is likely to be around 2-3 million tonnes in 2017-18 however, export will be lower due to higher domestic quotes compared to other major exporting countries.

Agriwatch has given its production estimate of 93.5 MMT for 2017-18. Carryout is expected to be around 13.98 MMT. Availability would be 108.48 MMT, higher compared to last year on account of increased production. Consumption is likely to be around 94 MMT.

As per third advance estimate for 2016-17 wheat production is likely to be around 97.4 MMT which is higher compared to second advance estimate of 96.6 MMT issued in February 2017. Grain quality is better this year compared to last year and there are no issues relating to higher moisture and pest. This year overall acreage is higher by around 4.5% over normal acreage of 304.05 lakh hectares.

Latest Developments In Domestic Markets: -

Since 29th June, FCI has offered a total quantity of 2170200 tonnes through various depots across India in OMSS until 20th July'17 at a reserve price of Rs. 1790 per quintal. The quantity bought through OMSS is lower this year compared to last year due to ample availability. In coming weeks the demand is likely to increase and buying activities in OMSS are likely to pick up. The next auction will be on 27th July'17.

Indian FoB quote is hovering around \$271.69 per tonne. Against it Russia, Ukraine, France, US and Australia are offering wheat at \$184.80, \$189.40, Euro 168.13, \$202.38 and \$229.83 per tonne respectively. The latest consignments from Australia landed at Tuticorin (28901 T), Cochin port (1000 T) and Mangalore (4000 T) at CiF of \$239.42, \$243.6 and \$226.02 per tonne respectively. Around 1500 tonne and 94665 tonne of wheat have been imported from France and Ukraine respectively.

Outlook & Recommendation:-Wheat cash market is expected to trade steady to firm in the coming week.

Trade Call: Stakeholders should trade in August contract taking care of lower and upper price tag of Rs 1612 & 1756 respectively.

Agriwatch Cereals Index:

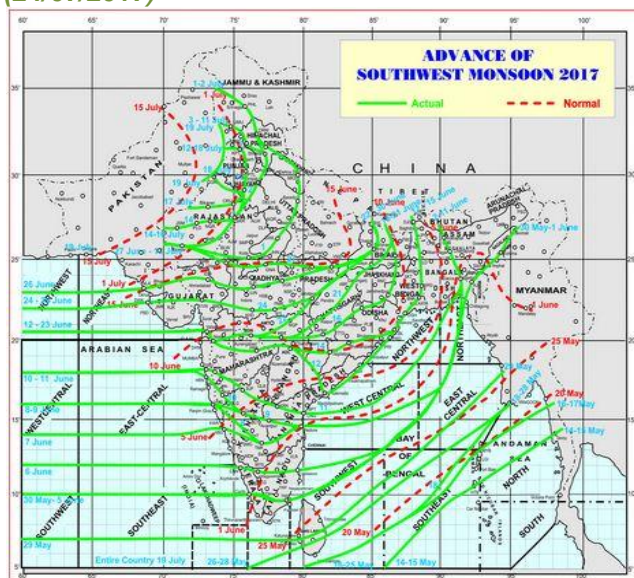

The Agriwatch Agri Commodities Index rose 0.74% to 110.34 during the week ended March 25, 2017 from 109.53 during the previous week led by higher cereals and pulses. The base for the Index and all sub-Indices is 2014 (=100).

Seven of the 9 commodity group sub-Indices and 15 of the 29 individual commodity sub-Indices that constitute the main Index gained during the week. Spices and Sweeteners were the only declining groups this week. The commodity group sub-Index values and their weekly changes are as follows: Cereals: 113.47 (+1.16%), Pulses: 137.35 (+3.20%), Vegetables: 41.18 (+0.41%), Edible Oils: 104.47 (+0.60%), Oilseeds: 90.01 (+0.80%), Spices: 97.92 (-3.29%), Sweeteners: 125.31 (-0.44%), Fibres: 115.44 (+1.72%) and Other Non-Food Articles: 95.34 (+0.08%).

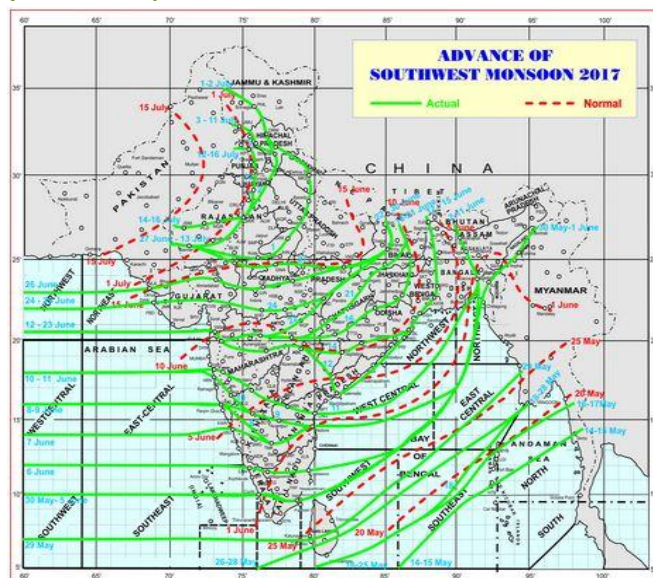

"Agriwatch has recently launched its AW Agri Commodity Indices to enable organizations access independent Indices to track and use to benchmark their purchases and sales. The Indices are based on the daily prices in the key benchmark markets for each commodity that AW has been covering for the past decade. The indices include an Aggregate Index, Category Indices and individual commodity indices. The weekly indices are free to access on our website www.agriwatch.com. The daily indices are available on subscription. Please contact for more details."

Weather Condition & Monsoon Progress: (24/07/2017)

(17/07/2017)

The axis of monsoon trough at mean sea level continues to pass through Jaisalmer, centre of low pressure area over south Rajasthan & neighborhood, Satna, Gaya, centre of low pressure area over Gangetic West Bengal and adjoining Jharkhand, Diamond Harbor and thence east-southeastwards to northeast Bay of Bengal and extends up to 2.1 km above mean sea level.

Wheat Weekly Average Price Chart:

Wheat average mill delivery prices traded firm in Delhi, Indore, Kota, and Ahmedabad during 14th - 20th July. Prices are expected to remain steady to firm.

Import is likely to continue in 2017-18 as imported wheat in south India is still cheaper compared to transporting it from north and central states. As of now government has no intention of increasing import duty. Trade activities are still at lower side as traders are still trying to understand various aspects of GST. Furthermore government has applied 5% GST on wheat that has been packed and branded.

All-India	330.00	308.01	229.62	34.13%

Total wheat procurement was registered at 229.62 lakh tonnes till 28th June -2016. Against set target of 33 MMT Government has procured 308.01 lakh tonnes until 14th July-17.

FOB Quote For Wheat At Kandla:

Wheat FoB quote in India witnessed firm sentiments last week. The demand for Indian wheat in the international market is low. Export window remains restricted due to huge disparity. There are no takers at higher level.

Abundant availability of wheat in international market at lower prices compared to export prices of India has also reduced demand of Indian wheat in international market. Unfavorable weather conditions in US, Black sea and Canada are increasing export quotes, thereby reducing price gap but not filling it completely. Prices of wheat may stay steady to firm at current level as beginning of festive season is likely to increase demand for wheat and provide support to domestic prices.

Wheat Export:

Wheat export volume has been negligible during last few weeks and there is no hope for any major recovery in coming weeks as disparity continues to discourage exporters.

India exported 294.62 tonnes of wheat during week ended 26th Nov-2016, down compared to exports in the previous week. Average FoB quote realized last week was \$366.49 per tonne. As prices are ruling lower in global market export opportunity for Indian wheat exporters seems bleak. Major buyers were Sri Lanka, UAE, Somalia and USA.

Wheat Import:

According to latest update, a total quantity of around 130066 tonnes of wheat has been imported from Australia, Ukraine and France after revision of import duty from 25% to 10%. Of the total quantity imported 94665 tonnes have been imported from Ukraine and rest is from Australia and France.

As import duty, has been slashed, import volume may be around 6 MMT in current MY. It would impact demand of south Indian millers from central and north India. Off-take from central pool may decrease.

Domestic Market Weekly Outlook:

Wheat cash market is likely to stay steady to firm in the coming week as beginning of festive season will lead to increase in demand for wheat which in turn would provide support to prices. Furthermore government has ample stocks to tackle any abnormal increase in domestic prices. Import duty is 10% and government has no intention of increasing duty as of now.

International Market Update:

As per Agritel, France is likely to harvest 36.6 million tonnes of soft wheat in 2017 up by 33 percent compared to last year. Yield is expected to be around 7.12 tonnes per hectare. Furthermore protein levels are likely to be more than 12 percent due to dry and hot weather in the end of growth cycle. As on 17th July farmers have harvested 66% of this year's soft wheat crop.

As on 14th July Russia has harvested 10.7 million tonnes of wheat compared to 14.2 million tonnes a year ago for the same date. Around 2.3 million hectares of area has been harvested with an average yield of 4.62 tonnes per hectare compared to 3.2 million hectares with an average yield of 4.42 tonnes per hectare a year ago for same date.

GASC has purchased 300000 tonnes of wheat through tender. Of the total quantity 120000 tonnes is of Russian origin, 120000 tonnes is of Romanian origin and 60000 tonnes is of French origin. Aston offered 60000 tonnes of Russian wheat at FoB \$203.45 per tonne, ADM offered 60000 tonnes of Romanian wheat at FoB \$204.60 per tonne, Ameropa offered 60000 tonnes of Romanian wheat at FoB \$206.08 per tonne, Solaris offered 60000 tonnes of Russian wheat at FoB \$204.94 per tonne, and Casillo offered 60000 tonnes of French wheat at FoB \$203 per tonne.

Wheat area in Ukraine came to around 6.28 million hectares. Farmers have started harvesting wheat and as of now they have harvested around 5.6 million tonnes of wheat. The ministry has given no official forecast regarding production of wheat harvest but analysts believe it to be around 23-25 million tonnes.

As per latest update, china has sold 202977 tonnes of wheat for average price of 1986 yuan (\$293.56) per tonne at an auction of state reserves. The quantity sold represents around 14.26 percent of 1422665 tonnes of wheat available at auction.

As per latest update, Japan's ministry of agriculture bought 93765 MMT of food quality wheat from United States and Australia. Around 62900 MMT with minimum protein content of 14 percent has been bought from United States to be loaded between August 21 - September 20 and 30865 MMT of standard white has been bought from west Australia to be loaded between September 1- September 30.

Buenos Aires grains exchange has reduced acreage for wheat from 5.5 million hectares to 5.4 million hectares. The reduction in acreage is mainly attributed to early rains in the month of July and humid weather that hindered planting in Buenos Aires and Entre Rios provinces. Furthermore, Rosario grains exchange has also reduced acreage for wheat from 5.6 million hectares to 5.45 million hectares.

Egypt is largest buyer of wheat in the world and has recently bought 115000 tonnes and 410000 tonnes in last two tenders from Russia and Romania. Egypt has imported around 5.58 million tonnes of wheat in 2016-17 compared to 4.4 million tonnes a year ago. It is expected to import 6.2 million tonnes of wheat in the coming financial year.

Algeria state grains agency OAIC has bought around 420000 tonnes of milling wheat in a tender that closed on Tuesday. The prices paid were in the range of \$213.75 - \$216.0 per tonne (Cost and Freight). The quantity to be shipped is due in September. Major part of the quantity is likely to be sourced from France but some quantity can come from Argentina as well.

IGC Wheat Balance Sheet:

IGC Forecast(Fig-In MMT)	2014-15	2015/16	2016/2017 (Forecast)	2017-18 (Proj)	
		Estimated		25.05.2017	29.06.2017
Production	730	738	754	736	735
Trade	153	166	173	169	170
Consumptions	715	718	738	738	735
Carryover stocks	206	225	242	239	241
Y-O-Y change	15	19	16	-	0
Major Export	66	68	78	68	67

- IGC has reduced its projection for wheat by 1 MMT to 735 MMT as on 29th June-2017 for 2017-18. According to forecast by IGC for 2016-17 global wheat production was around 754 MMT against 738 MMT for 2015-16. The difference is around 16 MMT from previous estimate. Higher projection for wheat may pressurize global wheat market at current level and any major recovery from current level is unlikely.
- Trade projection has been increased to 170 MMT. It is 3MMT lower compared to forecast for last year and higher by 4 MMT compared to 2015-16.
- Consumption has been kept unchanged at 735 MMT for 2017-18. The projection is higher by 17 MMT compared to 2015-16.
- Carryout has been kept unchanged at 241 MMT for 2017-18. It is lower by around 1 MMT compared to 2016-17.

(\$ per tonne)

CBOT moved down due to forecast for rain in regions plagued with dryness. Furthermore reduced area accompanied with decreasing percentage of spring wheat in good or excellent condition in USA had supported upward movement of prices.

International FOB Weekly Price Movement (USD/T)

Indian FoB quote is based on local price. There is no export in bulk volume currently. Indian FoB quote is hovering between \$266.10-275.96 per tonne.

US and Russian quotes are hovering in the range of \$202.38 and \$184.80 per tonne respectively. Wheat prices in international markets witnessed steady to slightly firm tone in the last week

Wheat quotes are expected to trade steady to slightly firm and hover in the range of \$170 to \$240 in coming weeks.

International Weekly Outlook:

Global wheat market is expected to trade from steady to firm as unfavorable weather is threatening upcoming crop in US, Black sea, Canada and EU. Yield for Wheat in France and Spain have been revised downwards due to heat wave observed in the past month. All this has led EU to revise its production forecast down by around 1.0 MMT to 140.7 MMT. Russian spring wheat planting has reached 12.8 million hectares (94.6% of the planned area) and total production for spring and winter season combined is likely to be 62 MMT in 2017 compared to 73.3 MMT in 2016. Production in US is likely to be around 47.8 MMT compared to last year's 62.8 MMT due to fall in area sowed. Australia is likely to produce 24 MMT in 2017 compared to 35 MMT in 2016. The fall in production is mainly due to lower area compared to last year. Argentina is expecting to harvest around 17.5 MMT in 2017-18 compared to 16.3 MMT in 2016-17. Furthermore, Canada harvested around 31.7 MMT as higher yields compensated for a 7% drop in harvested area. Therefore, Steady to firm market is expected in short to medium term.
