Wheat Domestic Market Fundamentals

[\(Back to Table of Contents\)](#)

All India weekly average prices decreased by 3.26 percent to Rs. 2077.20 per quintal during the week ended 23rd January 2019. Wheat average price were ruling at Rs 2147.23 per quintal during 09-15 January 2019. As compared to prices in the week 16-23 January 2018, the prices are firm by 11.22 percent. Prices are expected to remain weak in coming days due to abundant availability in domestic market.

Rajasthan government will provide wheat at Rs 1 per kg to below poverty line. This will benefit around 1.53 crore people. Furthermore, this would also help in reducing oversupply due to prospect of good production in MY 2019-20. Government will also bring special packages for farmers who pay their loan on time.

Government has offered 58616080 tonnes of wheat in OMSS since July until fourth tender in January out of which 5829850 tonnes was sold. Total numbers of rakes sold were 112. State government and bulk consumers bought 564600 tonnes and 4968450 tonnes of wheat respectively. 296800 tonnes was sold in dedicated movement. Government will sell wheat in open market at a reserve price of Rs 1950 per quintal in fourth quarter.

India mainly imports from Australia and Russia. As of now, Russian wheat with 12.5 percent protein content and Australian premium wheat (APW) is being quoted at \$351.00 (Rs 24552) per tonne and \$382.82 (Rs 26770) per tonne respectively, after including freight and import duty @30%. Local expenses will further add to cost. Therefore, there is no import parity as of now from black sea region and Australia.

As per latest update, area sown until 24th January'18 is 296.37 lakh hectares compared to 304.08 lakh hectares in the previous Rabi season. The normal area is 306.29 lakh hectares. Acreage of wheat in Madhya Pradesh is higher as farmers have shifted from chickpea. This year, as on 24th January'18, farmers have sowed 59.00 lakh hectares of wheat in Madhya Pradesh compared to 58.03 Lakh hectares last year on same date. Lower acreage was reported in Maharashtra and Gujarat due to low availability of water.

Indian FoB quote is hovering around \$308.43 per tonne. Against it Russia, Ukraine, France, US and Australia are offering wheat at \$237.00, \$235.80, Euro 204.13, \$228.35 and \$243.74 per tonne respectively. There is little hope for recovery at export front this year. However, India is expected to import around 0.2 million tonnes in MY 2018-19.

Previous Updates

As per market sources, wheat stock in central pool as on 1st January'19 stood at 271.00 lakh tonnes down by 11.52% compared to last month. This quantity is higher by around 38.53% compared to last year for the same month.

As per Agriwatch preliminary estimate, India is likely to produce 95.89 MMT of wheat for MY 2019-2020. Production is likely to be higher by 1.39 MMT compared to MY 2018-19. Higher acreage and favorable weather is the main reason for increase in production.

Wheat WPI has increased from 151.1 in October-2018 to 152.2 in November-2018. Monthly wheat inflation has increased by 0.73 percent in November -2018 compared to previous month.

As per trade sources, after increase in import duty to 30 percent imports have decreased substantially. India has imported no wheat in the month of November-2018. Furthermore, India has exported around 2.73 thousand tonnes in the month of November compared to 5.09 thousand tonnes in October.

Government has increased MSP of wheat by Rs 105 per quintal to Rs 1840 per quintal. This will motivate farmers to sow more area and thereby boost production of wheat.

Outlook & Recommendation: Wheat cash market is expected to trade steady to weak in the coming week.

Trade Call: Stakeholders should trade in February contract taking care of lower and upper price tag of Rs. 1950 & 2065 respectively.
