Wheat Weekly Research Report

Table of Contents

Wheat Domestic Market Fundamentals

(*Back to Table of Contents)*

All India's weekly average prices sharply increased by 3.57 percent to Rs. 2104.31 per quintal during the week 24th June to 30th June 2021 compared to Rs.2031.65 per quintal in last week. Wheat average prices quoted higher by 1.65% against Rs. 2070.03 per quintal during 24th–30th June 2020. Due to imposed of PMGKAY scheme till November 2021 wheat is likely to trade steady to weak tone in coming weeks. Slow procurement activity of government will also not support prices much.

Procurement of Wheat in ongoing RMS 2021-22 is continuing smoothly in the procuring States of Haryana, Uttar Pradesh, Madhya Pradesh, Rajasthan, Himachal Pradesh, Delhi, and Jammu & Kashmir at MSP, as was done in previous seasons, and till now (up-to 27.06.2021) a quantity of over 432.83 LMT of Wheat has been procured all time higher against 395.51 LMT in last year in the corresponding period of time. About 49.07 lakh farmers have already been benefitted with MSP value of Rs.85,483.25 crore from the ongoing RMS procurement operations. According to FCI, there were about 19,036 wheat procurement centres during the ongoing 2021-22 rabi marketing season. Total stock of wheat in the central pool is around 587.68 LMT which is higher than buffer stock norms.

During the current Rabi marketing season, the government may exceed its revised wheat procurement target of 433.5 lakh tonnes. Bihar may extend procurement till July 15, 2021, perhaps raising the set value for the current season. This season, 16 lakh tonnes of wheat were transferred by rail from mandies in Punjab, Haryana, and Madhya Pradesh during the pick procurement period, resulting in a reduction in mandies oversupply and smooth procurement procedures.

As per ministry third estimates, India is likely to produce higher Wheat crop in 2020-21. The country may produce 108.75 million tonnes in this season which is higher by 0.89% from 107.86 from last year record amid good monsoon rain last year.

Punjab Government and agencies have procured 132.10 lakh metric tonnes of wheat, 2 lakh metric tonnes more than the target set by the state, with more than 9.5 lakh farmers receiving over Rs 23,000 crore directly into their bank accounts. It was the first time in Punjab that farmers were paid directly instead of through arhtiyas or middlemen.

The government procurement agencies in Haryana have procured total 84.93 LMT consisting 6.94 LMT by FCI and 77.99 LMT by state agency. Expecting bumper produce this year, the government had increased the procurement target.

The Pradhan Mantri Garib Kalyan Anna Yojana (PMGKAY) which was announced in 2020, is being re-implemented given the worsening situation due to the second wave of Covid-19. Govt. has extended its time period till November 2021 to provide 5-kg additional food grains for free to PDS beneficiaries under the NFSA. This time, they are not providing pulses under this scheme.

Outlook & Recommendation: Wheat cash market is expected to trade range-bound movement with firm bias in the coming week.

Trade Call: There is no NCDEX trading currently.

Weather Outlook:- *Monthly rainfall for the July 2021 over the country as a whole is most likely to be normal (94 to 106 % of Long Period Average (LPA)).*

Wheat Weekly Average Price Chart

(Back to Table of Contents)

Despite the Kota market, prices rose in all of the major markets in the week ending June 29th –5th July, 2021, amid falling supplies of new crops. At Ahmedabad, markets were robust due to strong demand from stockiest and traders at the current level. In the immediate term, wheat is likely to trade in a range bound to firm tone on lower supplies. However weak price trend at CBOT may curb any major rise.

International Market Update:

(*Back to Table of Contents)*

AS per USDA, CBOT prices are driving through winter wheat harvest in U.S. Heavy supplies of new crop may put more pressures at CBOT prices. The percentage of the crop rated good to excellent slumped 10 points to just 27pc. Due to drought condition in Northern Plains of the U.S. CBOT prices are getting affected. Protein levels are also low in the US Hard Red Winter wheat harvest to date as well.

According to the USDA, the HRW crop harvest in the United States is 81 percent complete in Texas, 87 percent in Oklahoma, and 55 percent in Kansas. : The southern and central Great Plains showed cooler temperatures and precipitation this past week while the northern Great Plains saw sporadic rains and average temperatures. The drought worsened in the PNW with high temperatures (110-118°F / 43-48°C), which are expected to continue into next week. The SRW harvest in 2021 is still going strong, with 57 percent of the sampled crop collected so far despite rainfall in growing belts.

As per APK-inform agriculture consultancy, Ukrainian heat shipment bid prices declined by $4 a tonnes compare to last week after heavy crop size prediction. Ukraine is likely to harvest around 30 million tonnes of wheat this year against 25 million tonnes in 2020.

Argentina is expected to transport 12 million tonnes of wheat in 2021/22, according to the Buenos Aires Cereals Exchange, following a higher output projection for 2021/22. Internal wheat milling should also increase by 8.3% to 6.5 million tonnes in 2021/22 under this scenario.

Wheat export prices in Russia fell last week as a result of an expected good crop in the Black Sea region. In the new 2021/22 marketing season, wheat exports in Russia, Ukraine, and Kazakhstan could increase by 5%. At the end of last week, prices for new-crop Russian wheat with 12.5 percent protein loading from Black Sea ports and for supply in July were $248 per tonne FOB, down $7 from the previous week, potentially boosting Russia's exports in June 2021.IKAR, an agricultural consultancy, cut its projection for Russia's wheat output in 2021 from 79.5 MMT to 80 MMT. The estimate is 500,000 tonnes greater than the previous estimate.

European Union soft wheat exports reached at 25.10 million tonnes by June 20,2021 for the current season which is lower from 34.28 million tonnes in the corresponding period of time in last season. According to Strategie Grains, EU may grow higher soft wheat production for 2021 at 131.1 million tonnes, against 129.6 million in May'21 and 119.4 million tonnes last year. EU soft wheat exports in 2021/22 were now expected higher at 28.6 million tonnes from 27.0 million projected last month on account of improved competitiveness on the world market.

IGC Wheat Balance Sheet:

(Back to Table of Contents)

IGC Forecast (Fig- In MMT)	2018-19	2019-20 est.	2020-21 F'cast.	2021-22 Proj.

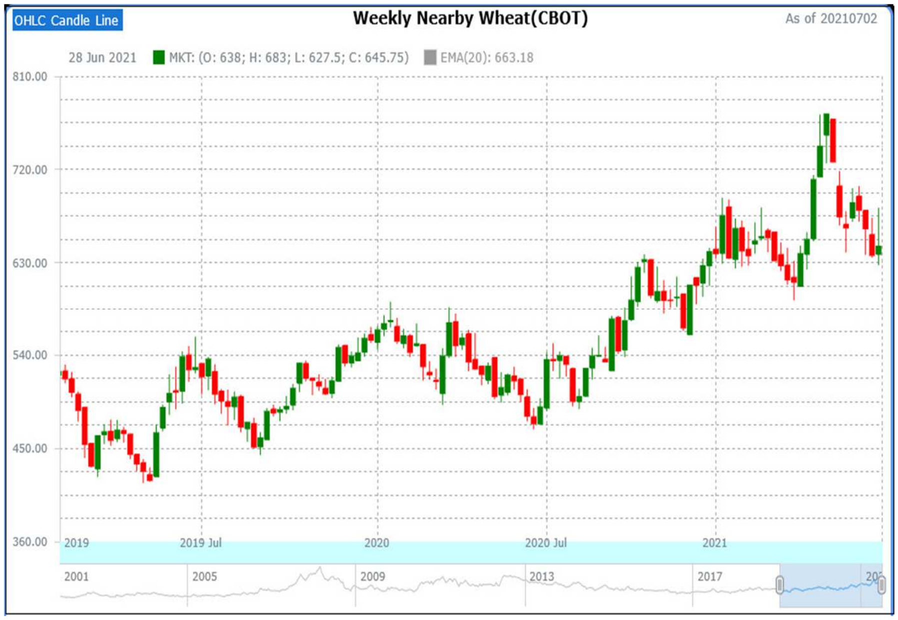
2nd Support: 607.00
1st Resistance: 680.75
2nd Resistance: 704.00
($ per tonne)

The July'21 contract closed higher by the end of the week likely to rise from the current level in coming week. Candlestick's pattern denotes a bullish trend in the chart. Rise in price and increase in open interest compared to last week, interprets firmness in market. We expect wheat prices to steady to firm in the coming week.



International FOB Weekly Price Movement

Indian FoB quote is based on local prices. Indian FoB quote is being quoted at $243.41 per tonne.
There is a lot of demand for wheat in the international market, and prices are up, due to which the Indian wheat demand will also increase. Exports will increase on an average compared to last year. Export to the surrounding countries will be good, but it does not seem to be exported in all the countries.
